Note: All bandwidth and modulation are tested, only the worst results are reported.

4.6 MODULATION CHARACTERISTIC

According to FCC § 2.1047(d), Part 24E & Part 27 there is no specific requirement for digital modulation, therefore modulation characteristic is not presented.

According to RSS-130, RSS-132, RSS-133, RSS-139, RSS-199 the equipment certified under these standards shall employ digital modulation, but there is no specific requirement for digital modulation, therefore modulation characteristic is not presented.

4.7 Out of band emission at antenna terminals

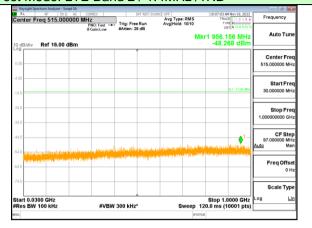

| Test Requirement: | FCC part22.913(a), FCC part24.238(a), FCC part27.53(h) and FCC part27.53(m), FCC part90.691, RSS-130 (4.7), RSS-132 (5.5), RSS-133 (6.5), RSS-139(6.6) and RSS-199(4.5) |
|-------------------|--|
| Test Method: | ANSI C63.26:2015 |
| Limit: | -13dBm |
| | Band 7/41: -25dBm |
| Test setup: | EUT Splitter Communication Tester Filter SPA |
| | Note: Measurement setup for testing on Antenna connector |
| Test Procedure: | The RF output of the transceiver was connected to a spectrum analyzer through appropriate attenuation. The resolution bandwidth of the spectrum analyzer was set at 1MHz, sufficient scans were taken to show the out of band Emissions if any up to 10th harmonic. For the out of band: Set the RBW=1MHz, VBW = 3MHz, |
| | Start=30MHz, Stop= 10th harmonic. 4 Band Edge Requirements: In the 1 MHz bands immediately outside and adjacent to the frequency block, a resolution bandwidth of at least 1 percent of the emission bandwidth of the fundamental emission of the transmitter may be employed to measure the out of band Emissions. |
| Test Instruments: | Refer to section 3 for details |
| Test mode: | Refer to section 4.1 for details |
| Test results: | Pass |
