- E. If you select "AP mode "after Click the "Add devices", you need go to WiFi settings and connected to hotspot, After connected, search WiFi router (no password). Device is connected.

#### How to connect Smart Lamp to Alexa

- 1. Launch Smart Life App, sign in your account and make sure Smart Lamp is in device list.
- 2. Modify device name so that Alexa can easily recognize, such as:Living RoomLight, Beddroom Light, etc.
- 3. Minimize Smart Life APP, then launch the Alexa App and sigh in your Alexa account and make sure you have at least one Alexa voice-controlled device installed like Echo, Echo dot, etc.
- 4. In the upper left corner of Home page ,click <=> button to show App menu. Then clicks "Skills" in the menu.

- 5. Type in Smart Life in the search and click the search button next to it.
- 6. Enable Smart Life to the skill, then sign in your Smart Life account to complete the account linking.
- 7. After linked account successfully, you can ask Alexa to discover devices. Alexa will show all the discovered devices after 20 seconds.
- 8. Back to Menu by clicking <=> button, and then click <Smart Home> button
- 9. In Smart Home page, you can group your devices for different categories. Your Smart Life APP has been skilled with Alexa. Now you can control your Smart Lamp through Alexa.

After your smart lamp is connected with Alexa successfully, you can simply ask Alexa set your lamp like this:

- -Alexa(or echo), set [bedroom light] to 50 percent. -Alexa(or echo), increase [bedroom light] to 50 percent.
- -Alexa(or echo), set [kitchen light] to blue.

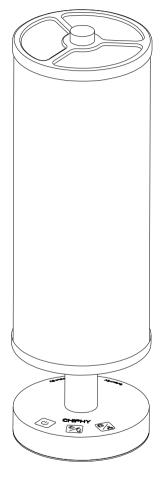

### Warm Tips:

- 1. Please check whether the device is connected with power and your phone is connected with Wi-Fi.
- 2. Check routers: If the router is dual-band router, please select a 2.4GHz network to add device. You also need to open the router broadcasting function.
- 3. Set up the wireless router: Set encryption method as WPA2-PSK authorization type as AES, or set both as auto. the Wireless mode cannot be only 5GHz.please name router WiFi in English. In order to stay strong WiFi signal, please keep evice and router within a certain distance.
- 4. Check whether connected devices have reached the Maximum number router connection. If so, please try to turn off the WiFi connection of some devices.
- 5. Make sure router wireless MAC filtering function is enabled.
- 6. Remove the device from the filter list and make sure that router is not prohibiting device from connection.
- 7. Make sure the entered password is correct when adding a new device.
