

Bluetooth System Connection Manual

Instructions for use:

1. Please connect the audio source cable to the places marked R and L on the Bluetooth control box to complete the connection.
2. Please connect the mobile power supplies with TPYE-C interface with self-contained power output above 2.1A to complete the connection.
3. Please confirm whether there is a red power connection indicator light in the Bluetooth control box.
4. After confirming that the red light in the Bluetooth control box is on, please turn on the Bluetooth device of the mobile phone and search for the name device of MARUTAI.
5. After the MARUTAI device is found and connected, a green light will light up to indicate that the connection is successful.
6. Congratulations, you can use the audio source software of your mobile phone to play your favorite music immediately.
7. While playing music, you can also use voice control such as mobile assistant SIRI to switch songs or control the volume.

You can also press the phone button or touchscreen control

Precautions:

1. Please note that the control box does not have waterproof and splash-proof functions. When using it, please keep it away from water or place it inside the package for protection.
2. The speaker and control box of this product are impact-resistant and suitable for playing music in harsh environments.
3. This product complies with the maximum volume limit allowed by the noise nuisance control regulations on construction sites in many countries.

Sound quality does not lie in the size of the sound, beauty, and safety are key.

4. This product can be connected to a variety of smart 3C products via Bluetooth, but after powering on, it will automatically search for the last connected product first.
5. Although this product is resistant to falls and earthquakes, it also has a maximum endurance limit, so it does not mean that it will not be damaged. Please use it with caution.
6. Please use a mobile power supply with an output of 2.1A or more for this product. When the quality of the mobile power supply is aging or the power supply is below 2.1A,

It is possible that the maximum power music output may not be possible, or a sudden interruption may occur. At this time, please change to another mobile power supply.

7. This product can be powered by a mobile power supply or a mobile phone charger for direct plug-in power supply.

But please use a fast charging head above 2.1A to provide power.

8. Do not disassemble the device arbitrarily for modification or replace it with a higher-power speaker for use.

This can cause damage to the speaker or the Bluetooth device.

9. The speaker assembly (front cover and speaker box) is an important device for reflecting the sound source, and it is relatively fragile when it is molded by ABS plastic.

Please use with care.

10. The warranty period refers to the sudden failure caused by a short circuit of the electronic components or the damage caused by the use of non-human factors.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Statement

The distance between user and products should be no less than 20cm.
