YR5302

Hand-held remote control instruction manual

## product information

### 1.Product size

Note: The length L of the remote control depend on product specifications (unit: mm)

### 2.Button function

- ①.Up/Open
- ②. Intermediate stop 75%
- ③.Down/Close
- ④. Intermediate stop 25%
- ⑤.Stop/50%
- ⑥.Channel selection
- ⑦.Channel setting

### 3. Product Specifications

Motor model	YR5302	Emission frequency	2402-2480MHz
Transmit power	6±1dBm	Communication protocol	BLE 5.0
Use battery	AAA BATTERY X 2pcs	Transmission channel	4

## LED indicator function

### ◆ Two channels modes

LED 1 is channel 1, and flashing LED indicates the signal is transmitting.

LED 4 is channel 2, and flashing LED indicates the signal is transmitting.

### ◆ Four channels modes

LED 1 is channel 1, and flashing LED indicates the signal is transmitting

LED 2 is channel 2, and flashing LED indicates the signal is transmitting

LED 3 is channel 3, and flashing LED indicates the signal is transmitting

LED 4 is channel 4, and flashing LED indicates the signal is transmitting.

## Channel setting

### ◆The way to switch two channels and four channels modes

The current maximum number of channels in use is set to two or four channel switch.

### ◆Two channel mode

Press the [Channel Selection] when the remote control LED is off, and the indicator light of the current channel will light up. Press the [Channel Selection] again within 3 seconds, and select the channel in the sequence of channel 1→ Channel 2→ group control channel → Channel 1.

**FCC Caution:**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
