- 5 Charge Interface

Key Functions

Answer Call	Press the "MF" button for 1 second when the call is incoming.
Charging	Plug the micro USB adapter to the micro USB port on the headphones. Then plug the micro USB adapter to a power source such as a computer or a USB charger. When charging, the red LED light is on.
End Call	Press the "MF" button for 1 second to end a call.
Enter the Pairing Mode	In power off mode, press the "MF" button and hold on for 3 seconds.
Fast Forward	Press and hold the "MF" button and red LED quickly 3 times and 2 deep sounds can be heard.
Last Number Redial	In standby mode, double click the "MF" button to redial your last call.
Low Battery Warning	The red LED light blinks.
Next	Press and hold "MF" for next song.
Pairing	Press the "MF" button for 3 seconds when the device is paired to a phone or other wireless device to perform the pairing button (the detail refer to the photograph about pairing).
Play / Pause	Press the "MF" button to play when the device is paired and press "MF" button to pause when the device is playing.
Previous	Press and hold "MF" for previous song.
Reject Call	Press the "MF" button for 2 seconds to reject an incoming call.
Turn Off	Press the "MF" button for 3 seconds when the device is on (headset will turn off and the red LED light will turn off).
Turn On	Press the "MF" button for 2 seconds when the device is off. (The blue LED light will turn on and a beep sound is heard.)
Volume Down	Press + to turn the volume down.
Volume Up	Press + to turn the volume up.

Caution

These headphones do not contain any reusable parts. Do not modify or dismantle these headphones, doing so will void your warranty and could cause electric shocks / fires.

Do not use headphones in an environment where there are explosive materials.

Charging Your Device

The device is easy to connect. Just plug one end of your USB cable into the port of your computer, PC, or laptop and the other end into the headphones. Then plug the USB cable into a power source such as a computer or a USB charger. The red LED light turns on the headphones. When the red LED light turns off, the headphones are fully charged for all day.

Pairing to a Wireless Device

Once your headphones are paired to a specific device, they will remain paired when they are within range. Turn on your device and ensure its wireless function is activated. Turn on the wireless stereo headphones. Then press the "MF" button on the headphones and the red LED light blinks. Turn on your device and discover the headphones under WaveLength®. Select it and your device will confirm the pairing.

Pairing to a Computer

There is no wireless function supported by your computer, a wireless computer will be required. Connect the headphones to your computer and ensure its wireless function is activated. Turn on the device, go to the pairing mode.

Open the wireless software and click on your computer and select the "Search your wireless devices" button. You will see the headphones listed. Click on the headphones for more information.

After a few seconds the WaveLength® will be in wireless software of your computer as a discovered device. Select this icon and click right button of mouse to select "pairing", then select "connect with this device" and click the right button on the mouse.

The Device is the Same Time

After pairing the first device, switch off the wireless function on the device. Then turn on the second device to pair with the headphones following steps outlined above. After the second device is successfully paired, the headphones will automatically connect to the second device. Both devices are now connected to the headphones so you can select sound from either device.

Pairing to a Computer

There is no wireless function supported by your computer, a wireless computer will be required. Connect the headphones to your computer and ensure its wireless function is activated.

Turn on the device, go to the pairing mode.

Open the wireless software and click on your computer and select the "Search your wireless devices" button. You will see the headphones listed. Click on the headphones for more information.

After a few seconds the WaveLength® will be in wireless software of your computer as a discovered device. Select this icon and click right button of mouse to select "pairing", then select "connect with this device" and click the right button on the mouse.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
