

April 26th, 2023

To whom it may concern,

For the following product model produced by GL.iNet:

- GL-XE300C4-Ext: Connect Universal Gateway ACR2G01

We declare the customization feature of BLE IoT module as below:

In reference to operational description, the BLE IoT module part is a reserve feature/placeholder position for customization of IoT projects. For ARDx Informatics functionality, this customization (Bluetooth feature) on schematic is not installed for Informatics internal part number, ACR2G01.

Yours sincerely,

Amy Fei / Head of Key Account Department
