

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a wooden workbench holds a spectrum analyzer and a power supply unit. A black cable connects the two. To the right, a large wooden board stands vertically, with a smartphone placed on top of it. The background is a plain wall with some electrical outlets.
Radiation Emission Test Setup (Below 30MHz)	 A photograph showing a radiation emission test setup. A white, box-like device is placed on a metal stand in the center of a room. The walls are covered with white, rectangular, curved absorbers. The floor is grey and has yellow and black striped safety lines. A metal frame is visible in the foreground.

Radiation Emission Test Setup (30MHz to1GHz)	 A photograph showing the interior of an anechoic chamber. The walls are covered with white, square-shaped electromagnetic wave absorbers. In the center, a white, box-like test fixture is mounted on a metal stand. Several vertical metal rods are visible in the foreground, likely part of a probe or antenna array.
Radiation Emission Test Setup (1GHz to18GHz)	 A photograph showing the interior of an anechoic chamber. The walls are covered with white, square-shaped electromagnetic wave absorbers. A white, box-like test fixture is mounted on a metal stand. A red, curved object, possibly a probe or antenna, is visible in the foreground. The floor is marked with yellow lines.

**Radiation Emission
Test Setup (Above18GHz)**

*** Means' only test and setup for PART 15C .**
