

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup

Radiation Emission Test Setup (Below 30MHz)

Radiation Emission Test Setup (30MHz to1GHz)	 A photograph of a radiation emission test chamber. The interior walls are covered with white, cross-shaped electromagnetic wave absorbers. A white, rectangular test fixture is mounted on a black circular base in the center of the chamber. Blue and white striped safety tape is laid out on the floor around the base. To the right, a metal frame structure is visible.
Radiation Emission Test Setup (1GHz to18GHz)	 A photograph of a radiation emission test chamber, similar to the one above but for a higher frequency range. The interior walls are covered with white, cross-shaped electromagnetic wave absorbers. A white, rectangular test fixture is mounted on a black circular base in the center of the chamber. Blue and white striped safety tape is laid out on the floor around the base. In the foreground, a metal frame structure with a circular opening is visible. The floor is covered with a black, textured material.

**Radiation Emission
Test Setup (Above18GHz)**

*** Means' only test and setup for PART 15C .**
