The results are not used to indicate or imply that they are application to the similar items. In addition, such results must not be used to indicate or imply that SMQ approves recommends or endorses the manufacture, supplier, or use of such product/equipment, or that SMQ in any way guarantees the later performance of the product/equipment.

The sample/s mentioned in this report is/are supplied by Applicant, SMQ therefore assumes no responsibility for the accuracy of information on the brand name, model number, origin of manufacture or any information supplied.

Additional copies of the report are available to the Applicant at an additional fee. No third part can obtain a copy of this report through SMQ, unless the applicant has authorized SMQ in writing to do so.

The lab will not be liable for any loss or damage resulting for false, inaccurate, inappropriate, or incomplete product information provided by the applicant/manufacture.

### **2.2. Laboratory Accreditation and Relationship to Customer**

The testing report were performed by the Shenzhen Academy of Metrology and quality Inspection EMC Laboratory (Guangdong EMC compliance testing center), in their facilities located at NETC Building, No.4 Tongfa Rd., Xili, Nanshan, Shenzhen, China. At the time of testing, Laboratory is accredited by the following organizations:

China National Accreditation Service for Conformity Assessment (CNAS) accredits the Laboratory for conformance to FCC standards, EMC international standards and EN standards. The Registration Number is CNAS L0579.

The Laboratory is Accredited Testing Laboratory of FCC with Designation number CN1165 and Site registration number 582918.

The Laboratory is registered to perform emission tests with Innovation, Science and Economic Development (ISED), and the registration number is 11177A.

The Laboratory is registered to perform emission tests with VCCI, and the registration number are C-20048, G20076, R-20077, R-20078 and T-20047.

The Laboratory is Accredited Testing Laboratory of American Association for Laboratory Accreditation (A2LA) and certificate number is 3292.01.

### 3. GENERAL INFORMATION

Aerial measurements (active) are performed in the Universal Test RayZone-5000M. The Rayzone 5000 has 23 pairs of dual-polarized (H&V polarized) measurement antennas. The Rayzone 5000 has two communication antennas (LA1 & LA2). LA1 is used for 2G/3G/4G/Sub6G/WIFI/BT/Cat M/NB-IoT testing. LA2 is used for NSA testing and is mounted on the circular arch at equal spacing. The electronic switching of the probe antennas provides excellent measurement speed. The geometric setup with only one foam strut within 1.6 meters of the DUT ensures minimal interference and low ripple in the measured radiation pattern.

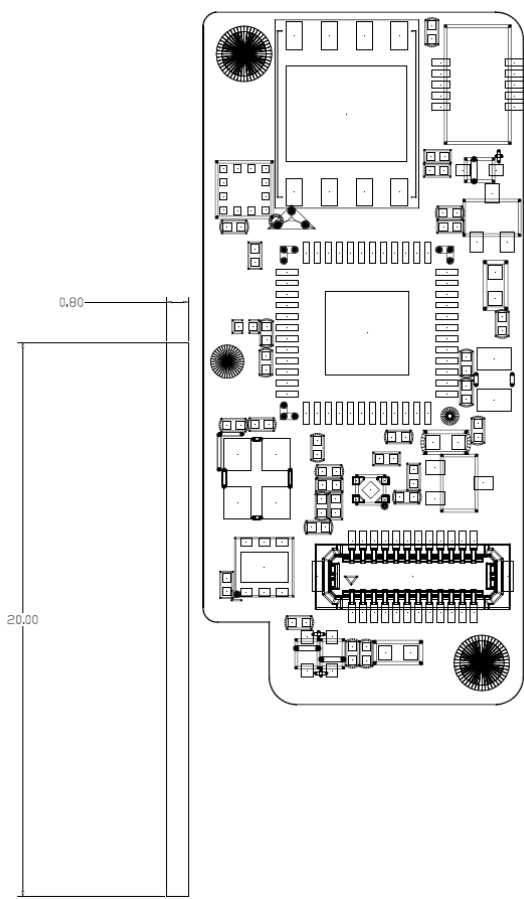

**Figure 1**– RayZone-5000M. The DUT is placed on top of the pedestal, in the center of the system.

### 4. TEST PROCEDURE

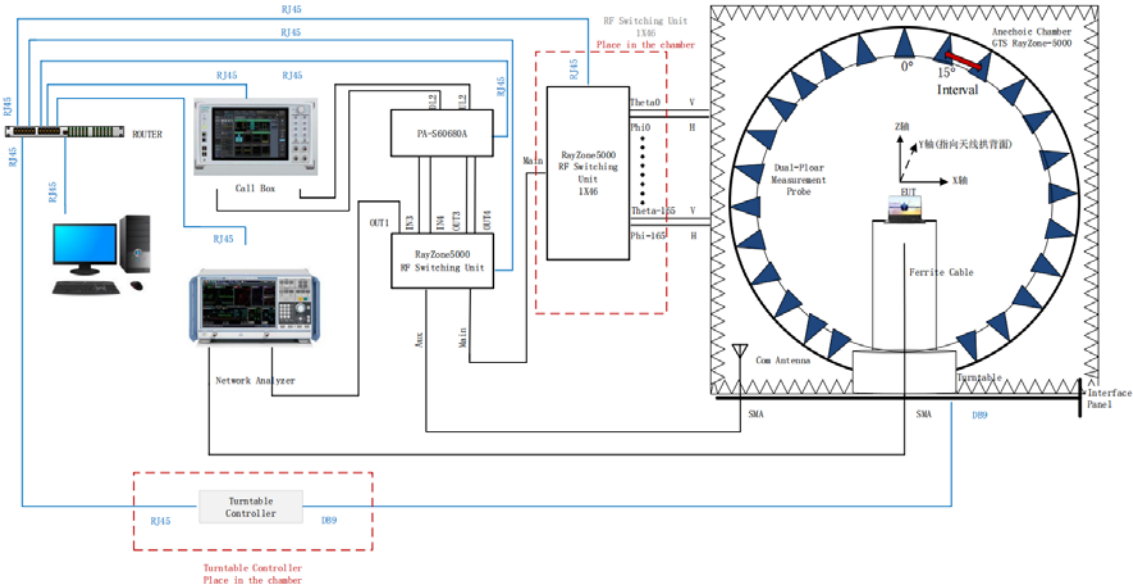

The gain of the antenna was measured in a RayZone-5000M anechoic chamber. From 400 MHz to 6 GHz, the reflectivity of the chamber is less than -30 dB. The dimensions of the chamber are 4.97\*4.97\*5.0 (m). The measurements were calibrated using a dipole antenna. The antenna gain and efficiency were measured with an AUT placed inside the chamber.
