RE: Data Re-use justification

Grantee Code: 2BASD

FCC FRN: 0033626524

To whom it may concern:

This is to confirm that the FCC ID: 2BASDAMTMEC20234, known as MEC, has the SDR card 'N310' installed, and the FCC ID: 2BASDAMTBN20233, known as HC2, has the SDR card 'B210' and SDR card 'N310' installed. SDR cards of 2BASDAMTBN20233 and 2BASDAMTMEC20234 are electrically identical when installed in an end user device. Power settings, and configuration settings are programmed identically. Therefore, the conducted licensed testing of licensed band for 2BASDAMTBN20233 can be re-used to 2BASDAMTMEC20234. The HC2's conducted test data shall remain representative of the MEC so, MEC (this model) leverages conducted test data from HC2.

The enclosure and other components, such as power supply and CPU, may be different.

Yours sincerely,

Amantya Technologies Pvt. Ltd, India
