Justification for Re-use of Radio Test Results

We, KoreLock Inc, believe that the conducted signal test data on original reports provided by the Laird Technologies FCC ID: SQGBL654 Report# FR813002 on 29th Jun 2018 & ESPRESSIF SYSTEMS (SHANGHAI) CO., LTD FCC ID: 2AC7Z-ESPS2MINI2U Report# FR262716 on 31th July 2023 can be re-used for the following reasons:

1. Applicant has built in the radio module according to the specific radio module integration guides.
2. No changes have been made on radio module.
3. Re-test the conducted power for spot check verification, the radiated spurious emission, and reevaluated the RF Exposure.

Also, we have disabled the 802.15.4 proprietary protocol in the BLE module.
