smartwatches

产品手册

Thank you for choosing our smart watch. You can read this manual to fully understand how to use the device. This device is mainly connected to the mobile phone through Bluetooth for adaptation and use.It provides a variety of practical functions and services to facilitate your operation of the mobile phone.Human movement and health functions.The company reserves the right to modify the contents of this manual without any prior notice without notice

Instructions
Side button function:
1. Upper right button: Short press to turn on the screen when it is off, and short press to enter the menu style interface when it is on. Double click on the menu interface to switch styles.
2. Bottom right button: In the off screen state, short press to turn on the screen, turn off the screen, and long press to turn off.
3. Upper left button: Quickly enter sports mode
4. Touch gesture: On the dial interface, slide down to enter the shortcut control center, slide up to enter the program dock, slide right to enter split screen, and slide left to enter the function interface.
5. Dial switching: Rotate the upper right encoder to switch the dial.

Charging instructions:
Put the bottom of the watch into the wireless charger base,the watch will automatically hold it; if the green light on the wireless charger is on,it means it is charging,and there will be a charging interface prompt on the watch end.After charging is completedthe watch will prompt to charge 100%.
Connection between watch and mobile phone:
First,the mobile phone must download the APP"RDFit" to the mobile phone and install it in two ways.
1、IoS/Android phone user:
Scan the QR code below through the mobile browser,or scan it with WeChat.When the interface is opened,click the Android/iOS download option and choose to open the download with the mobile browser.

The QR code in the figure below is the RDFit APP download

Android/IOS

2、For Android phones, search for"RDFit" and download in App Store,Google Play, and various mobile app stores,and for Apple phones,search for"RDFit"and download on the App Store.
After the download is complete,there will be various permission reminders during the installation process, click to agree to all, and the watch and the mobile phone must be connected to two Bluetooth 3.0 and 4.0 to realize all functions.
Bluetooth 4.0 connection method: After the installation is complete, open "RDFit" and turn on the Bluetooth of the mobile phone.RDFit will have an enable notification prompt,click oK.Click More in the lower right corner,enter Scan Device, search for Bluetooth address and click Connect. Some Android phones need to turn on the GPS of the phone to search for the Bluetooth name of the watch.
Bluetooth3.0connection method:
1.Open the main menu of the watch-Bluetooth-Search for Bluetooth-select Activate Bluetooth -click the Bluetooth name of the mobile phone you want to connect-prompt to connect to the Bluetooth device,click OK, and click agree to the mobile phone permission reminderClick pairing Bluetooth 3.0 to connect.
2.Turn on the bluetooth of the mobile phone,-click the bluetooth name of the watch you want to connect-connect the bluetooth device according to the prompt,and the mobile phone displays "Connected".
How to verify that the Bluetooth connection is successful:
When the watch pulls down the status bar, when the watch 3.0 and 4.0 Bluetooth are color colors, it means that the Bluetooth connection is successful.When the color of the Bluetooth logo is grayed out, it means that the Bluetooth is not connected.

Simple handling methods for common problems: Since the Bluetooth protocol of each mobile phone brand is not uniform,sometimes the Bluetooth connection between the mobile phone and the watch may be unstable.You can turn off the Bluetooth of the mobile phone and reconnect it again, or reset the watch to factory settings.

How to set the notifications: Mobile phone enters settings-should have management,find"RDFit" -permission management,open all.Then enter the notification management-find all the permissions of"RDFit" to open.Open"RDFit"-more-application push-open the background running permission, enter the option unlimited.When you return,you will be prompted to open the auto-start again and enter the open. Go back,select the APP for synchronization information notification, such as QQ WeChat, and select Open.

Note:If the WeChat computer version is online at the same time,the mobile phone will not receive notifications. Some mobile phones also need to add"RDFit" to the power saving whitelist to avoid being turned off by the mobile phone when the batteryis low. What should I do if I do not receive thenotification?
First of all, the notification function of the watch is only to synchronize the notification function of the mobile phone, such as incoming call and letterQQ WeChat letter reminder, if your mobile phone does not receive the notification,then the watch will not receive it.You should find the corresponding APP in the phone settings-notification functionTurn on the permission notification.
