

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

–Reorient or relocate the receiving antenna.
–Increase the separation between the equipment and receiver.

–Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

–Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example– use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

RF warning statement:
The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.

GloryFitPRO

INSTRUCTIONS FOR USE

Power on/ off

- Power on: Charge or long press the button for 3 seconds to turn it on;

PRECAUTIONS

- Do not disassemble, repair or modify the watch by yourself.
- Do not expose to chemicals such as gasoline, cleaning solvents, alcohol or insect repellents.
- Do not use in high–pressure, high–magnetic environments.
- Do not wear the watch in a hot bath, saunas, etc.
- Do not turn on more pushes without special needs.
- It is strictly prohibited to use over–voltage load power supply for charging. (Smart watch KE6 supports 5V 500MA charging.)

·It is prohibited to throw it into the fire to avoid an explosion.

·Please avoid severe impact, extreme heat and sun exposure to the watch.

·Please dry it with a soft cloth before charging when the watch gets wet, otherwise the charging PIN will corrode and lead to charging failure.

·It may be uncomfortable if you have sensitive skin or wear the watch too tightly.

·Please dry the sweat on your wrist in time, the watch band may cause skin allergy and itching if it contacts with soap, sweat, allergens or polluting ingredients for a long time.

·Weekly cleaning of the watch is recommended. Wipe with damp cloth and use mild soap to clean up of oil or dirt.

FAQ

What should I do if Wireless connection fails ? (Failed to connect/reconnect or very slow to connect/reconnect)
Note: Confirm that your device is iOS 11.0+ or Android 5.0+ or above and supports Wireless.

1. Due to the problem of signal interference in wireless connection, it may take too long to connect each time. If you can not connect for a long time, please make sure that the operation is carried out in an environment without magnetic fields or interference from multiple Wireless devices.

2. Turn Wireless off and turn it on again.

3. Close the APP or restart your phone.

4. Your phone should not be connected to other Wireless

devices or features at the same time.

5. Make sure the app is running properly in the background, if not the connection may fail.

Can't search for the watch ?

1. Please make sure the watch is in a charged and activated state and not connected to another phone; then put the watch close to your phone.

If it still doesn't work, turn off the Wireless on your phone, and then restart the Wireless after 20 seconds.

2. Make sure your phone has GPS turned on.

Why should I wear my watch tightly when measuring my heart rate ?

Smart watch KE6 uses the principle of light reflection to calculate your heart rate by capturing the signal reflected back to the sensor after the light source penetrates your skin. If you don't wear it tightly, ambient light will enter the sensor and affect the measurement accuracy.

Why don't I get message notifications when I have notifications turned on ?

For Android phones:

First, make sure your phone and watch are connected, then turn on the corresponding permissions in the phone settings, allow "GloryFitPRO" to access incoming calls, SMS, contacts, and keep "GloryFitPRO" running in the background.

If your phone is installed with security software, please add "GloryFitPRO" as trusted.

For iPhone: If there is no reminder after connecting, it is recommended to restart the phone to reconnect.

When connecting the watch again, you must wait for the phone to pop up the [Wireless Pairing Request] – [Pairing].

Is the smart watch waterproof ?
Support IP68 waterproof and dust–proof rating) Can be worn while washing hands, in the rain, or washing the car.)

Does the Wireless connection need to be on all the time ? Is there still data when disconnected ?
Data is retained on the watch before it is synchronized (7 days of data can be retained).

When the Wireless connection between the phone and the watch is successful, the data of the watch will be uploaded to the phone automatically, please synchronize the data to the phone in time.

Note: If you turn on the call and notification function, you must keep the Wireless in the connection state, and the alarm clock reminder supports offline.
