

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a black plastic housing. A green printed circuit board (PCB) is visible, populated with various electronic components including a yellow capacitor, a black integrated circuit, and several resistors. Wires of different colors (red, green, black, yellow) are connected to the board. A black ruler with white markings is placed vertically to the left of the housing for scale.
Solder Board-Component View 1	 A close-up photograph of a small green PCB component. The component has a red rectangular component, likely a battery or a capacitor, and several other small components. It is connected to a circular, flexible, multi-layered component via two thin wires. A black ruler with white markings is placed vertically to the left of the component for scale.

Solder Board-Component View 6	 A photograph of a green printed circuit board (PCB) component with various electronic components soldered onto it. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). A red and black cable is connected to the component.
Antenna View	 A photograph of the same green PCB component, showing a circular coil antenna attached to it. The antenna is a spiral of thin, light-colored conductive material. A red line points from a label "Coil Antenna" to the antenna. The component is placed on a blue textured surface.
