If the following methods do not solve your problem, please contact the purchaser or the online service in the app for further assistance.

Problems	Solution
Camera offline?	<ol style="list-style-type: none"> 1. Please check if the 4G network signal around the camera is good and avoid signal interference in the neighbourhood; 2. check whether the camera battery is fully charged. Please try to charge it before switching on the camera; 3. Check whether the traffic package of the camera SIM card has expired. Please contact the after-sales service through the APP "Help & Feedback" for assistance.
Alarm not detected?	<ol style="list-style-type: none"> 1. Check if the app's notifications are turned on; 2. Improve the motion detection sensitivity of the camera;
Can I connect to WiFi?	Wi-Fi is not supported, only 4G network is supported
What is the amount of 4G data consumed per month?	The amount of traffic consumed by the camera depends on the resolution you have selected for viewing. The higher the resolution, the more traffic is consumed. The longer the preview video and video playback time, the more data is consumed. The more times the PIR sensor is triggered, the more traffic is digested. The camera consumes about 2-8GB of cellular data per month.
How do I set the alert alarm tone?	Enter the device settings page, select the alert voice, you can switch the alert sound or custom recording and other settings, if there is no option may be the device does not support the

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
