It supports wireless charging.

**Horizontal and vertical charging screen:** When connected to the power supply and

placed horizontally or vertically, the bedside clock interface will be displayed.

### **Connection between watch and mobile phone:**

First, the mobile phone must download the APP "RDFit" to the mobile phone and install it in two ways.

#### **1.IOS/Android phone user:**

Scan the QR code below through the mobile browser, or scan it with WeChat. When the interface is opened, click the Android/iOS download option and choose to open the download with the mobile browser.

**The QR code in the figure below is the RDFit APP download**

**Android/iOS**

2.For Android phones, search for "RDFit" and download in App Store, Google Play, and various mobile app stores, and for Apple phones, search for "RDFit" and download on the App Store.

### **Simple handling methods for common problems:**

Since the Bluetooth protocol of each mobile phone brand is not uniform, sometimes the Bluetooth connection between the mobile phone and the watch may be unstable. You can turn off the Bluetooth of the mobile phone and reconnect it again, or restore the watch to the factory settings.

### **How to set the notifications:**

Mobile phone enters settings-application management, find "RDFit"-permission management, open all. Then enter the notification management-find all the permissions of "RDFit" to open.

Open "RDFit"-more-application push-open the background running permission, enter the option without restrictions. When you return, you will be prompted to open the auto-start again and enter the open. Go back, select the APP for synchronization information notification, such as QQ WeChat, and select Open.

### **What should I do if I do not receive the notification?**

First of all, the notification function of the watch is only to synchronize the notification function of the mobile phone, such as incoming call and letter, QQ WeChat letter reminder, if your mobile phone does not receive the notification, then the watch will not receive it. You should find the corresponding APP in the phone settings-notification function , Turn on the permission notification.
