Justification for Re-use of Radio Test Results

We, Halsababy Inc. believe that the conducted signal test data on original reports provided by the Raytac Corporation (FCC ID: **SH6MDBT50Q** approved on July 26, 2018, FCC Report Number: E2/2018/50091 & IC: **8017A-MDBT50Q** approved on Oct 25, 2019, IC Report Number: E2/2018/50101-02) can be re-used for the following reasons:

1. Applicant has built in the radio module according to the specific radio module integration guides.
2. No changes have been made on radio module.
3. Re-test the conducted power for spot check verification, the radiated spurious emission, and re-evaluated the RF Exposure.

We are utilising the software to disable Zigbee protocol in the Raytac MDBT50Q-P1MV2 Module.
