Please Read before Use

- While in use, the surface of the charger may feel warm to the touch- this is normal, and not a cause for alarm- you may continue to use it without concern. Our products meet strict international safety standards.
- Keep the charger away from liquids, heat sources, and flammable items, as well as toxic and corrosive substances. The storage and operating environment of the product must be between 0-40°C.
- Do not modify, disassemble, open, drop, crush, puncture or otherwise damage the charger. Desist from using damaged products.
- It is recommended that you disconnect your device(s) from the charger after charging has completed.
- It is advised that the charger be unplugged from the wall socket when no longer in use.
- Products are intended to be used only in non-tropical climate conditions and at altitudes lower than 2000m above sea level.
- Do not expose this charger to high temperatures and store this charger in a dry environment away from direct sunlight.
- Misuse, dismantling, or mishandling of this product which fails to comply with this manual may result in damage to your connected device(s) or to the charger itself. In the event of damage to a product resulting from such actions, Innostyle is not liable for compensation, replacement, or repair of said products.
- To maintain peak performance, the battery should be fully charged and depleted at least once every three months.
- Under normal circumstances, battery performance can be expected to decline slightly over a period of several years.

Packaging Content

- * 1 x MagStation 3-in-1
- * 1 x USB-C to USB-C Cable
- * 1 x User Manual

Specifications

SKU	IMWC311BLK
Input	5V~3A, 9V~3A

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement:
The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance between 20cm the radiator your body.
