

Appendix A. Test Setup Photos

The equipment under test was placed on a wooden desk inside of shield room. The isotropic field probe was used to measure the field strength for 5 EUT surfaces, RF exposure evaluation at 20 cm from the surface, the separation distance is maintained between EUT and the center of the field probe. (The Probe to shell is 8 mm)

Top Side @ 20cm separation distance

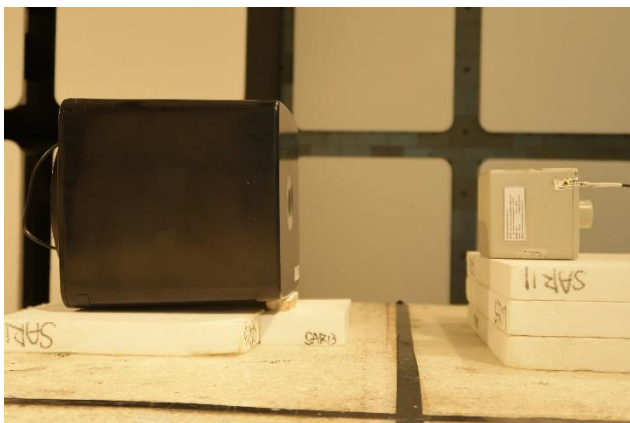

Bottom Side @ 20cm separation distance

Left Side @ 20cm separation distance

Right Side @ 20cm separation distance

Front @ 20cm separation distance
