

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.

I. Product parameters

- a. Compatible mobile phone system: Android5.0 (inclusive)or higher, iOS9.0 (inclusive) or higher
- b. Main control: RTL8763EWE-VP
- c. Screen: 1.28 AMOLED Round Screen Resolution: 416*416

II.Operating instructions

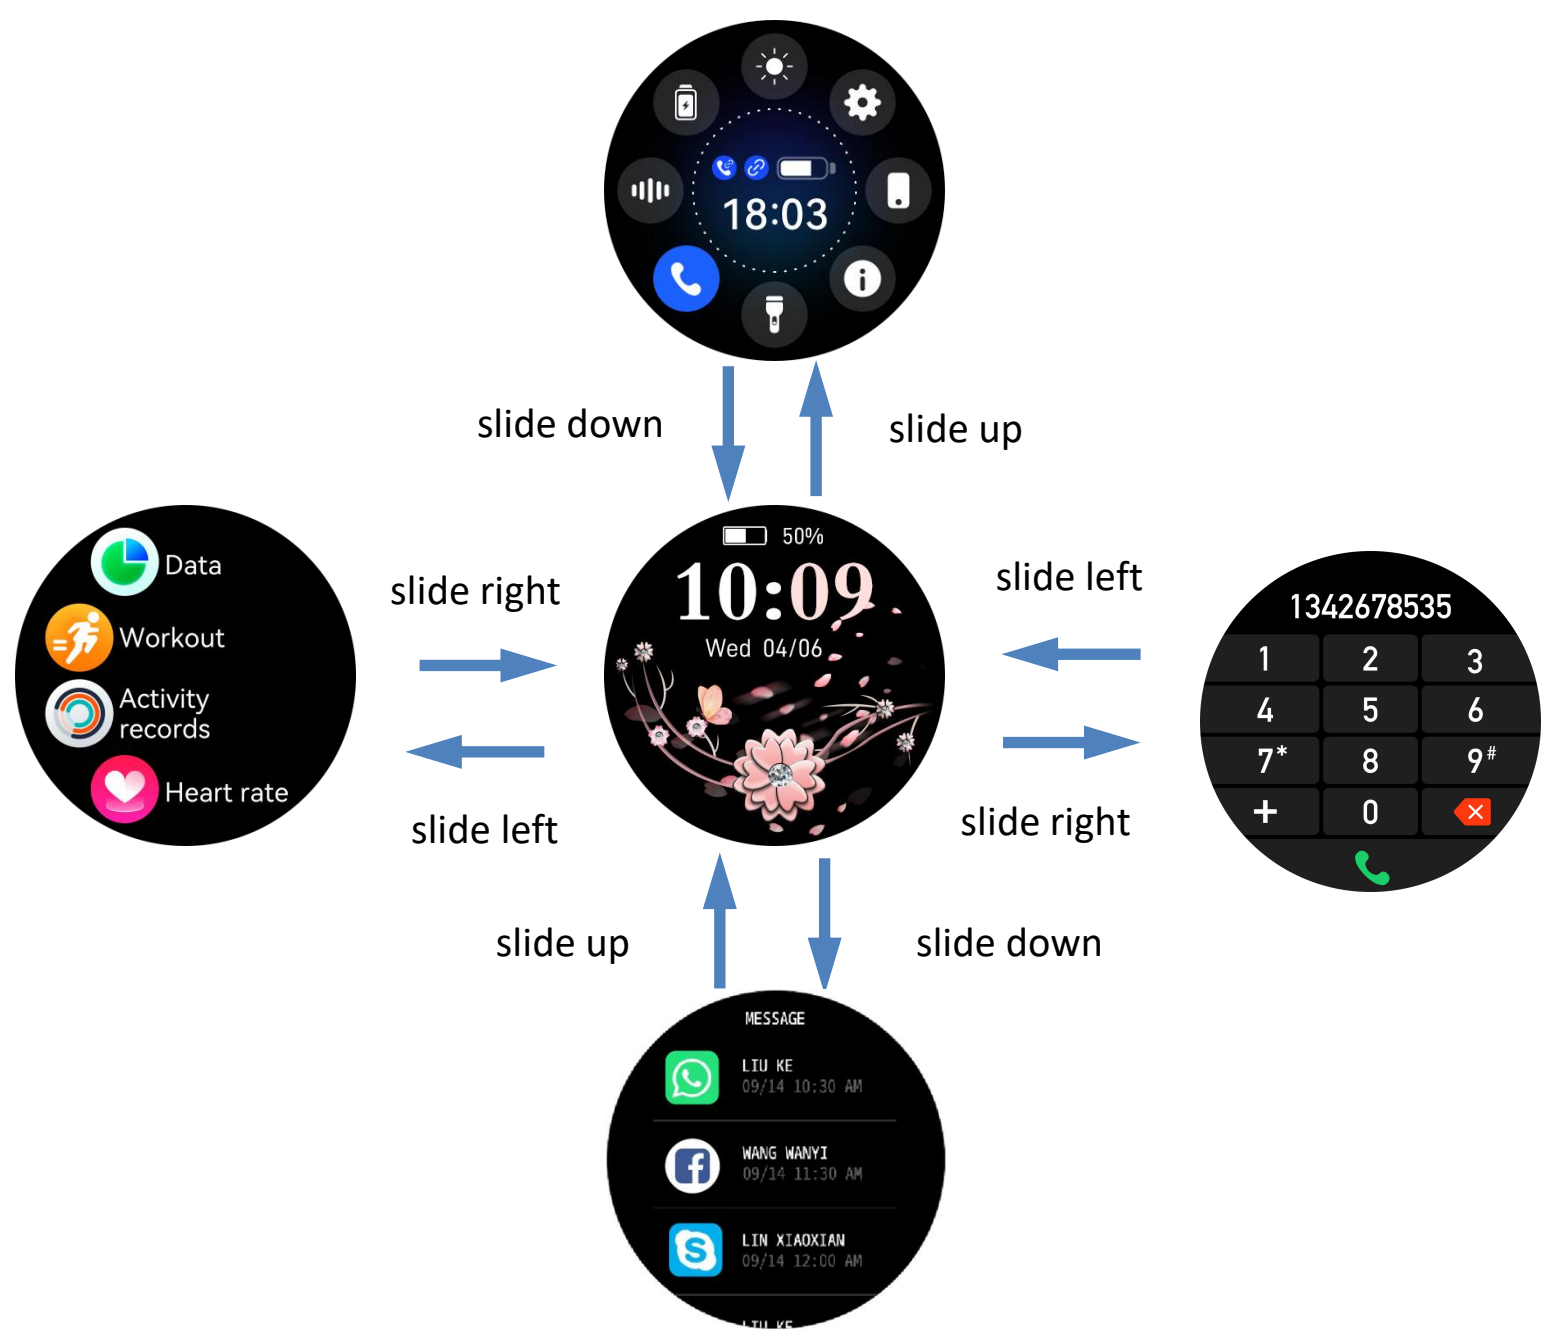

1.Button operation

Status/Operation	Function
power button: power off/long press for 5 seconds	power on
power button: power on/long press for 3 seconds	power off
Power on button: Short press	Enter the main interface
Power on button: Short press	Return to the main interface
Encoder: Rotation	Main interface rotation switch dial/menu interface rotation up and down movement

2.Screen operation

Status/Operation	Function
single click	Select / OK
home page/long press for 3 seconds	switch dial
home page/slide up	message list
home page/slide down	Shortcut menu
home page/slide left	Call/Voice assistant/Motion recording/Sleep information/Heart rate monitoring/Blood pressure monitoring/Weather/Music/Add components
home page/slide right	enter home page

3. Charging instructions

- a. Please use the charging cradle equipped with the product to align the contacts on the back of the host to charge (please ensure that the battery is sufficient for the first use. If the battery cannot be turned on normally at low power, please charge it before operating. Please charge correctly as shown in the right picture)
- b. Do not use a power adapter with an output current of more than 2A to charge

4. Download and install the "FitCloudPro" APP

- 1).Scan and install by scanning the QR code on the right
- 2).Download and install through the app market:
Android system: search for "**FitCloudPro**" through App Store, Google play, Android Market and other app markets to download and install; IOS system: search for "**FitCloudPro**" through the App Store to download and install

5. APP connection

(make sure mobile phone Bluetooth is turned on and not connected with other devices) shortcut menu→settings→about interface, the MAC address of the watch will be displayed, and your device can be determined by the MAC address in the device table. After the watch is successfully bound, the watch will be automatically connected with the mobile phone every time the client is opened in the future. You can synchronize data by pulling down the data page of the client.

Open the mobile client app to set personal

Half-circle menu

List menu

Nine-grid menu

Circular menu

Note: more detailed analysis and data records can be viewed in the app

Frequently asked questions and answers

Why does the blood pressure value deviate from the sphygmomanometer?

The deviation between the measurement values of the watch and the sphygmomanometer is determined by many factors. The measurement part of the sphygmomanometer is in the brachial artery, and the measurement part of the watch is in the two main public branches of the micro artery. Under normal circumstances, the measurement value of aortic blood pressure and micro arterial blood pressure will differ by 30 to 40. If you use a watch and a sphygmomanometer to measure at the same time, since the blood flowing in the artery is in the centrifugal direction, when the sphygmomanometer measures, the lower part of your elbow is under pressure, and the blood cannot branch smoothly to the artery below. Flow, increased vascular tension, will make the upper and lower blood pressure measurements more deviations.

Why can't user take a hot bath with the watch?

The ambient temperature during bathing is relatively high, which will produce a lot of water vapor, and the water vapor is gaseous, its molecular radius is small, and it is easy to seep into the gap of the watch. When the temperature drops, it will condense into liquid water droplets again, which is easy to cause The internal circuit of the watch is short-circuited, destroying the circuit board, and then destroying the watch.

Frequently asked questions and answers

Why can't the watch receive the message push

Android phone settings;

Confirm that the message push switch is turned on on the mobile client

The confirmation message can be displayed normally in the mobile phone notification bar. The watch message push is pushed by reading the message in the mobile phone notification bar. If there is no message in the mobile phone bar, the watch will not be able to receive the push. (You need to find the

notification settings in the phone settings, and turn on the notification switch of WeChat, QQ, phone, SMS, and mobile client) Open the accessibility settings of the bracelet client (Find the accessibility in the phone settings, open the accessibility settings of the bracelet client) iPhone settings Confirm that the message push switch is turned on on the mobile client The confirmation message can be displayed normally in the notification bar of the phone (You need to find the notification settings in the phone settings, and turn on the notification switch of WeChat, QQ, phone, SMS, and mobile client)

Precautions

Do not throw this product into the fire to avoid explosion. This product is waterproof only for cold water. If it is used for hot water, it may cause white fog in the lens. The battery life of this product varies with the use environment and use mode
