

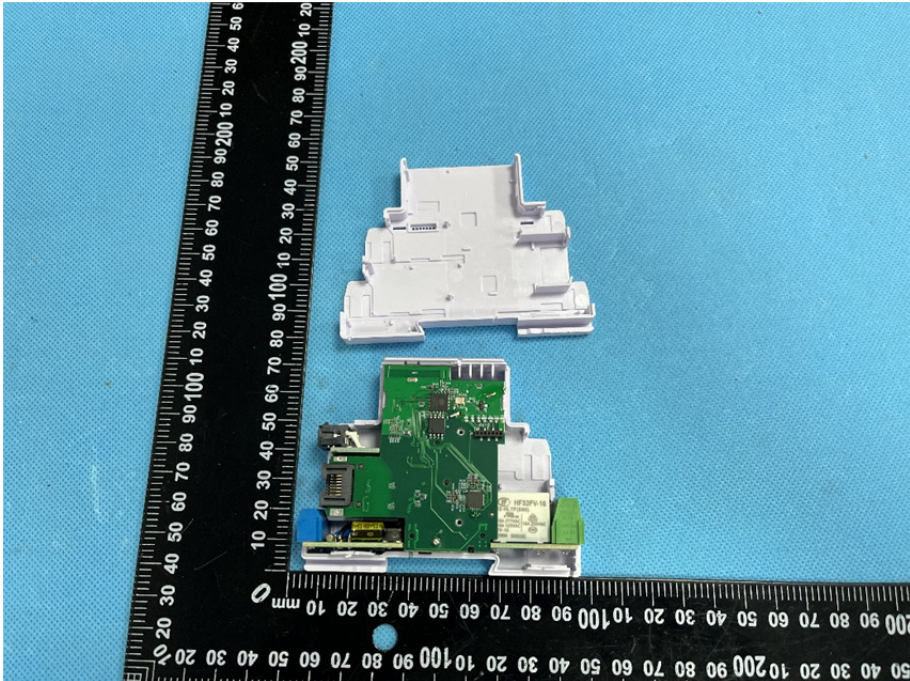

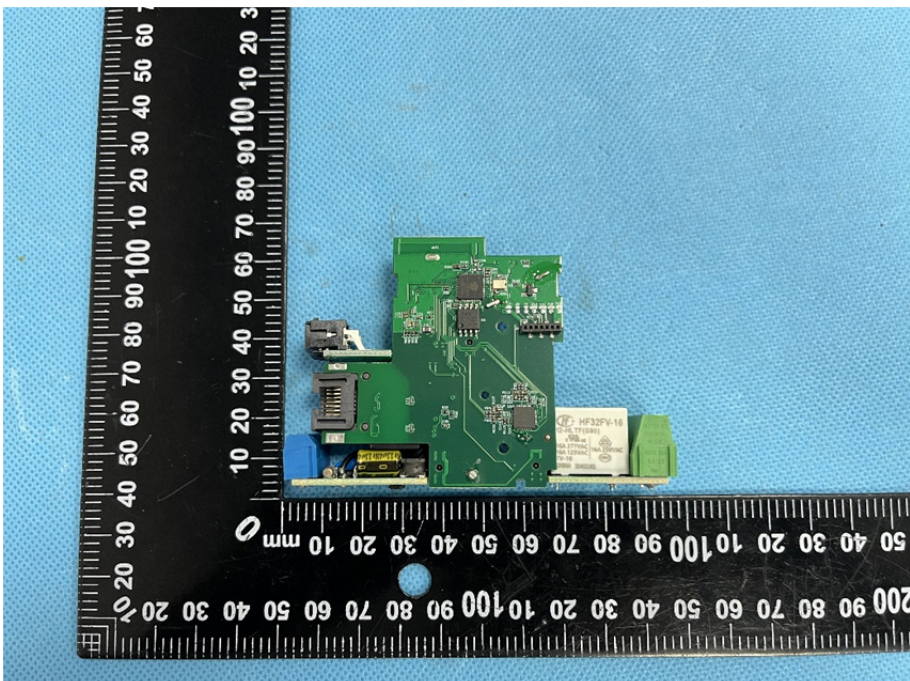

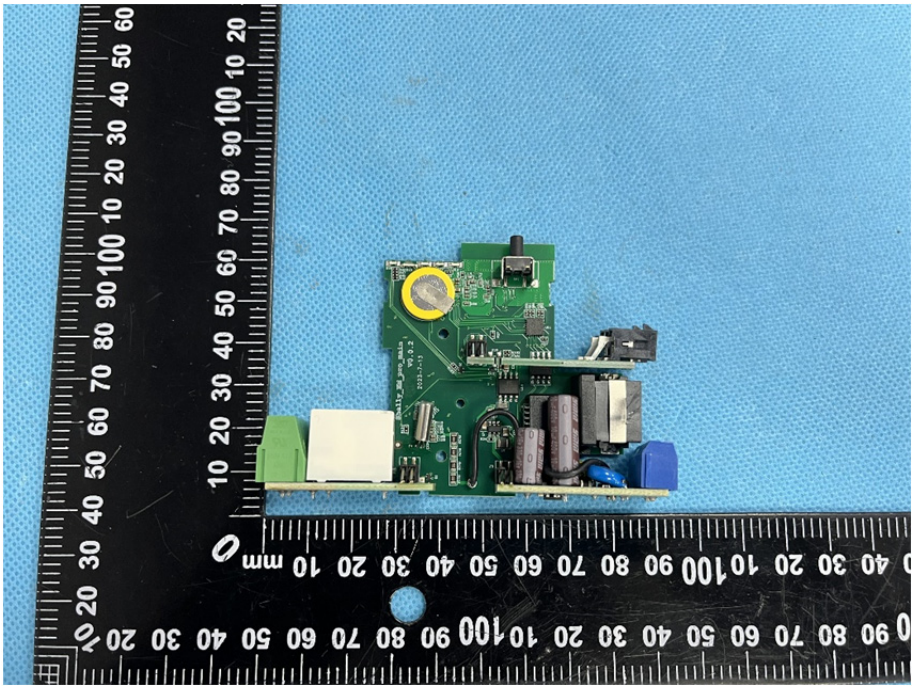

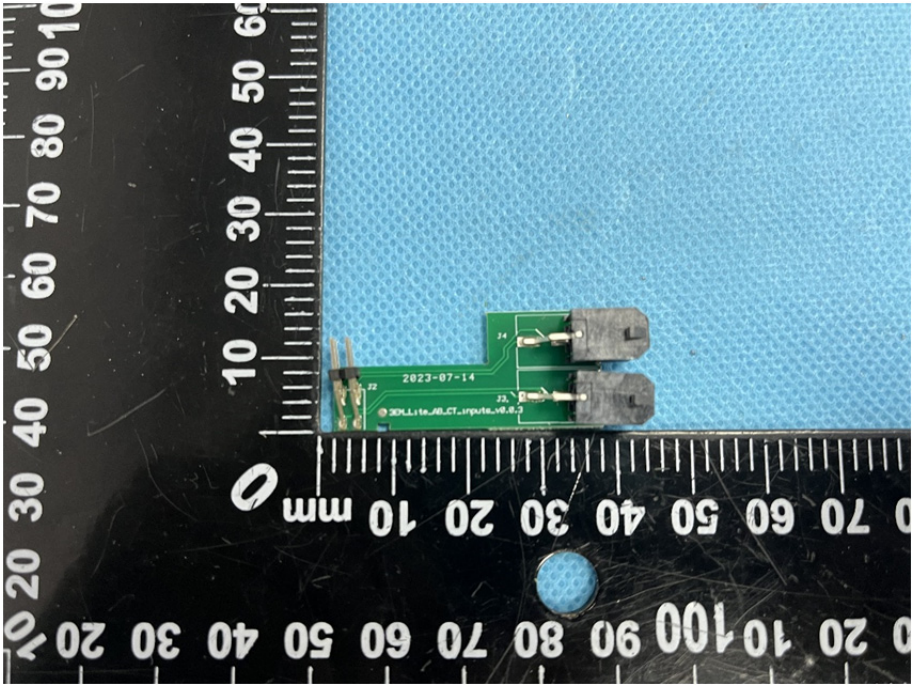

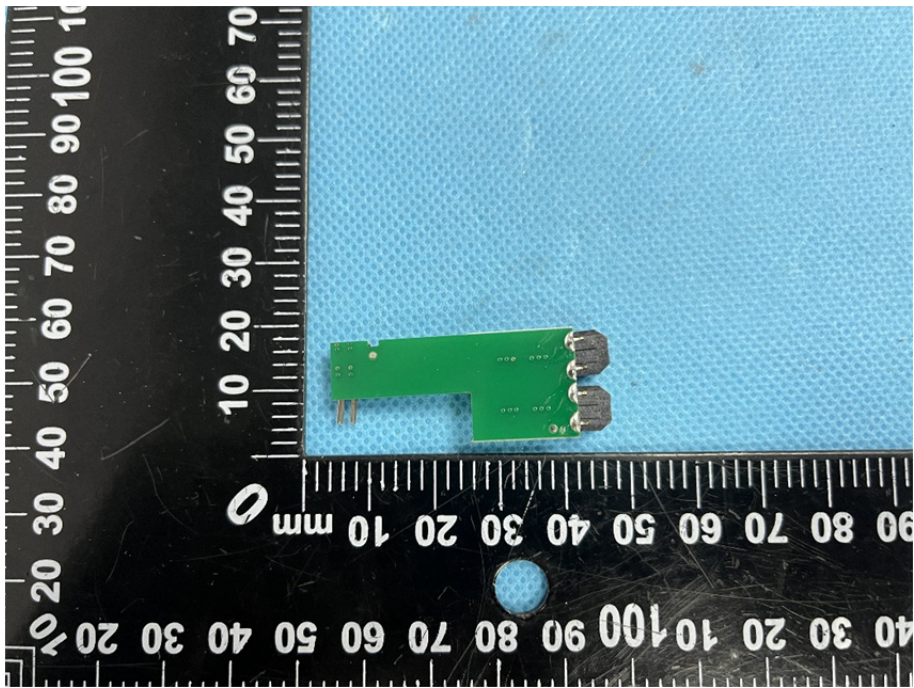

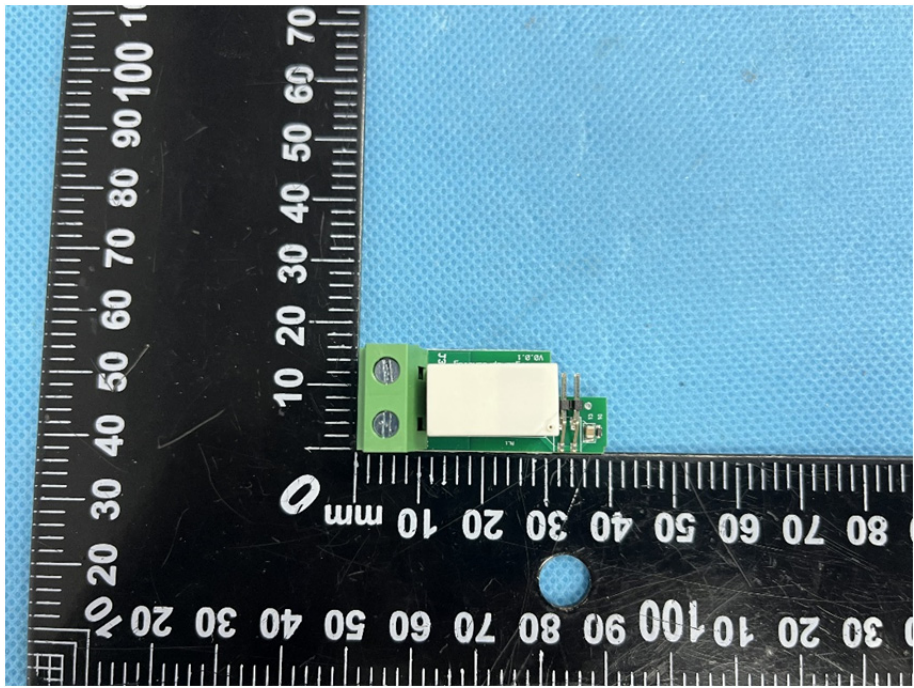

### EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p><b>EUT Housing and Board View 1</b></p>	 A photograph showing the white plastic housing and the green printed circuit board (PCB) assembly. The components are placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler is oriented vertically, with the 0 mark at the bottom. The housing is positioned above the PCB. The PCB has various components, including a yellow component on the left and a green component on the right. The ruler shows markings from 0 to 100 mm.
<p><b>Solder Board-Component View 1</b></p>	 A close-up photograph of the green PCB assembly. The components are placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler is oriented vertically, with the 0 mark at the bottom. The PCB has various components, including a yellow component on the left and a green component on the right. The ruler shows markings from 0 to 100 mm.

<p><b>Solder Board-Component View 2</b></p>	
<p><b>Solder Board-Component View 3</b></p>	

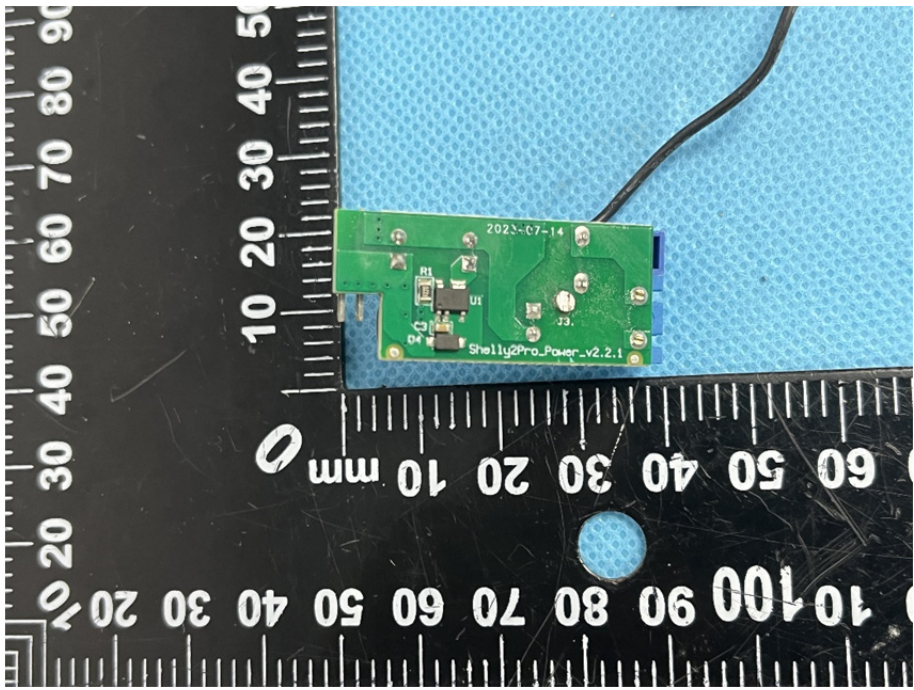

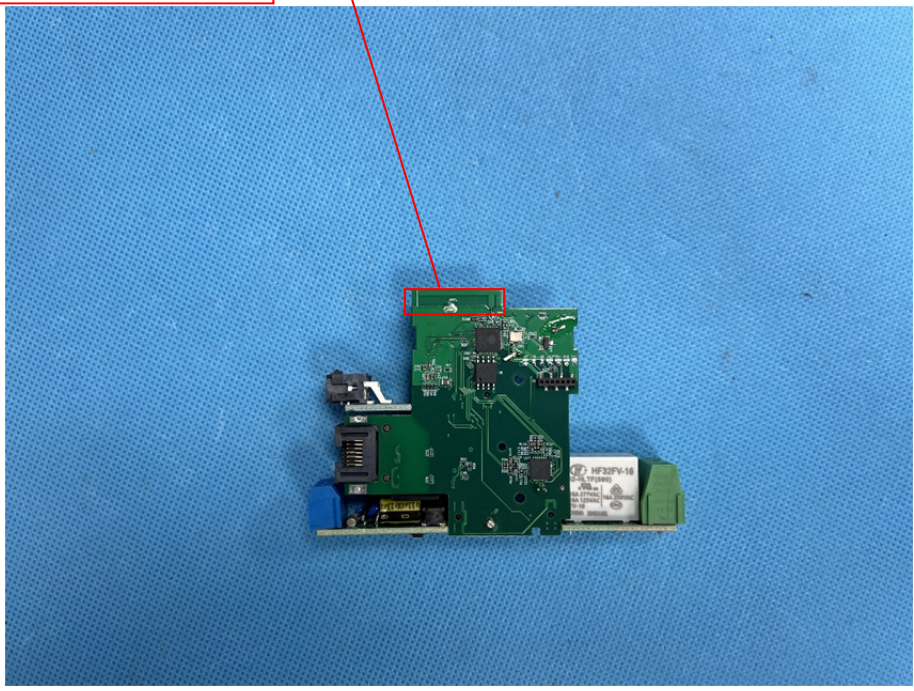

<p><b>Solder Board-Component View 4</b></p>	 A photograph of a small green printed circuit board (PCB) component. The component is rectangular with a notch on one side and has four silver-colored solder pads on the right edge. It is placed on a black surface with a white ruler for scale. The ruler shows millimeter markings from 0 to 100. The component is positioned between the 10 mm and 30 mm marks on the ruler.
<p><b>Solder Board-Component View 5</b></p>	 A photograph of the same green PCB component from a different perspective. This view shows the top surface of the component, which has a white rectangular area in the center. The component is placed on the same black surface with a white ruler for scale. The ruler shows millimeter markings from 0 to 100. The component is positioned between the 10 mm and 30 mm marks on the ruler.

View 7**

<p><b>Solder Board-Component View 8</b></p>	 <p>A photograph of a green PCB component with a black wire attached. The component is placed on a black surface with a white ruler for scale. The ruler shows markings in millimeters, with '10 mm' and '0' clearly visible. The PCB has several components labeled 'R1', 'U1', 'J3', and 'D4'. Text on the board includes '2023-07-14' and 'Shelly2Pro_Power_v2.2.1'. The component is positioned against a blue textured background.</p>
<p><b>Antenna View</b></p>	<p>WIFI/BT Antenna</p>  <p>A photograph of the same green PCB component from a different angle, showing the antenna area. A red box highlights the antenna structure, and a red line points from a label 'WIFI/BT Antenna' to it. The component is placed on a blue textured background. A white label on the board reads 'MF32FV-16'.</p>
