C. User Manual x 1

A diagram of the device tilted at a 60-degree angle. The device is shown in a perspective view, tilted upwards. A curved double-headed arrow at the bottom indicates the tilt angle, which is labeled as 60°.

Model:	W13
Capacity:	20000mAh
Power:	77Wh/3.85V
TYPE-C Input:	5V=3A 9V=2A 12V=1.5A
TYPE-C Output:	5V=3A 9V=2.2A 12V=1.66A
USB A Output:	5V=3A 9V=2.22A 12V=1.67A
Wireless Output:	15W (Max)

1. Press the power button once to activate the wireless fast charging mode. (The LED screen will show the current battery level of the portable charger and the green lightning symbol.)  
\* Press the power button twice in succession, the LED light will go out and the power will be turned off.
2. Place your phone on the portable charger. For best results, make sure it is centered on the circular icon of the portable charger.
3. Remove the portable charger or double-press the power button to end charging. (Press the power button once to wake up the device to charge again.)

\* To protect the battery life of the phone, when the phone is charged to about 80%, it will automatically turn off the fast charging mode.

\* In order to prolong the life of the product, the output speed may be slow when the multi-device are charged at the same time.

If this equipment does cause harmful interference to radio or television reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator & your body.
