- Step One:** Take out the USB receiver on the bottom of the mouse, then insert to the computer. Open the battery cover, install an AA battery according the polarity mark in the battery box.
- Step Two:** Open the battery cover of the keyboard, install an AA battery according the polarity.
- Step Three:** Once the installation is complete and turn on power switch, you can use it. Plug and play without any drivers.

2

Automatic Power Saving Function

RECCAZR wireless keyboard and mouse combo adopts energy saving technology.

Keyboard:
The keyboard will enter standby mode after stop using over 5s, the indicator light will turn off. You can continue using the keyboard without any wake-up operations, the indicator light will resume after continued use. When the battery is low, the power indicator light will blink.

Mouse:
The mouse will enter sleep mode after stop using over 15 minutes. Unplug the receiver or after the PC shutdown, the mouse will enter sleep mode too. You can press the button or scroll wheel to wake up the mouse. The first keystroke used to wake up will not generate an instruction (to prevent wrong action).

FCC Notice:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference. (2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

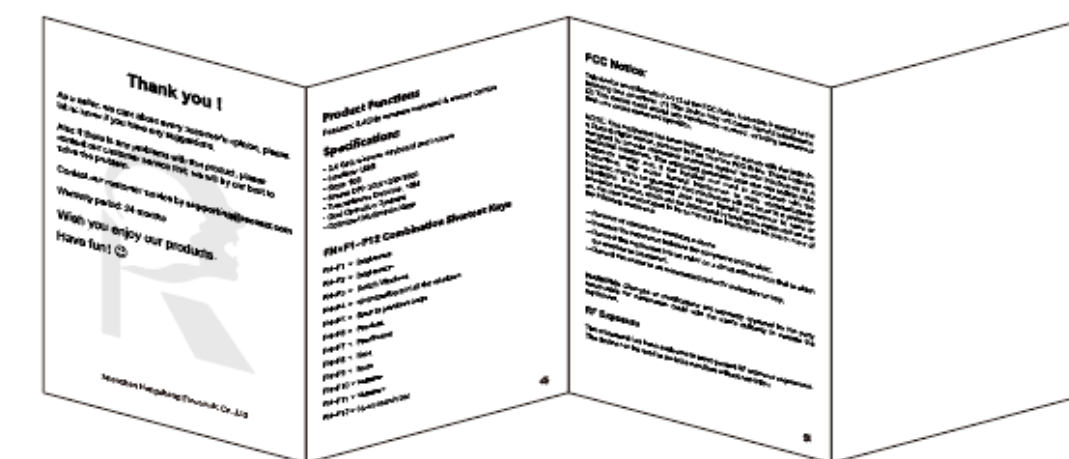

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure

The equipment has been evaluated to meet general RF exposure requirement. The device can be used in portable condition without restriction.
