

## Antenna Specification

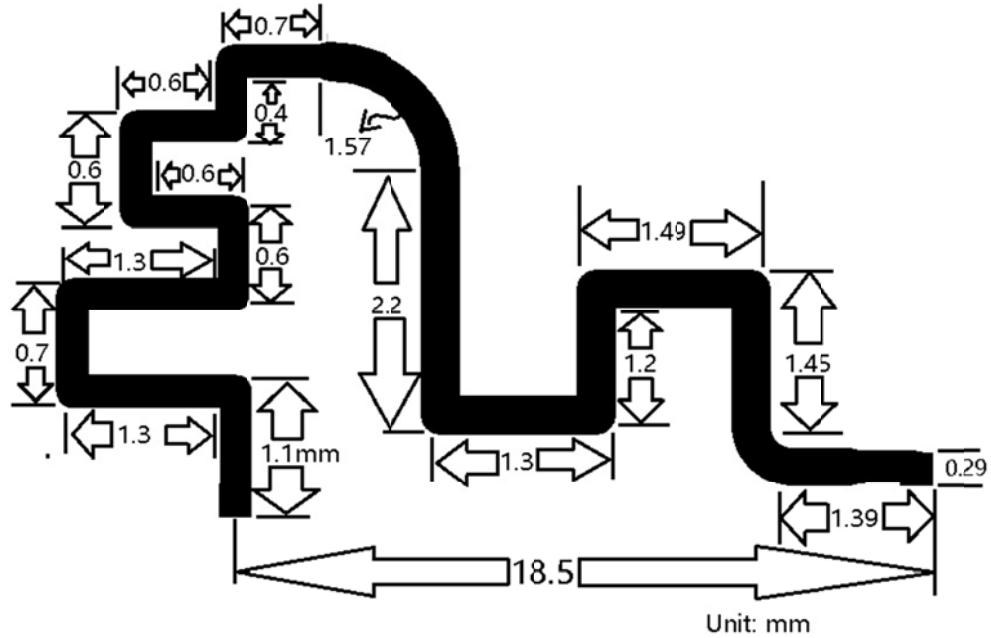

#

|                |                                                                                                                                |          |         |
|----------------|--------------------------------------------------------------------------------------------------------------------------------|----------|---------|
| Model Name     | 2.4G FHSS ANT                                                                                                                  |          |         |
| Frequency      | 2400MHz                                                                                                                        | 2450MHz  | 2500MHz |
| Gain (dBi)     | -1.02dBi                                                                                                                       | -0.45dBi | 0 dBi   |
| MAX. Gain      | 0 dBi                                                                                                                          |          |         |
| Impedance      | 50 $\Omega$                                                                                                                    |          |         |
| Antenna Length | 18.5mm                                                                                                                         |          |         |
| Manufacturer   | Shenzhen Myryder Technology Co.,Ltd<br>4th Floor, Building 1, Puhua Science and Technology Park,<br>Longhua District, Shenzhen |          |         |
