HOW TO TRANSFER THE SOUND TO CAR SPEAKERS

This unit has built-in speaker, but if you want louder sound, you can transfer it to your car's speakers:

1. by FM radio transmitter

Set the same FM radio channel on the unit and your car's radio (please avoid using the channel to be occupied by the FM station)

2. By AUX cable

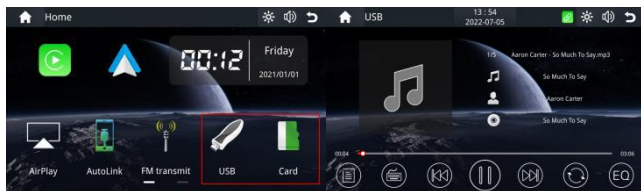

Plug the aux cable into the unit audio port and your car's original aux port if your car has.

Note:

When using FM or AUX, the product itself will have no sound

Multimedia and bluetooth

If you insert a memory card or U disk, the device supports playing music, video and pictures

When your device is only connected to the phone's bluetooth, you can use bluetooth music

You can use "phone" to make calls

To use it, carplay or android Auto cannot be connected

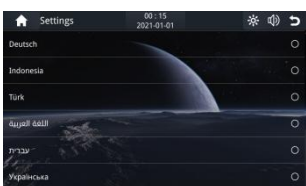

language settings

Before using, if you need to set other languages, you can do the following

Tap on Settings--> system--> language

You can set the language of multiple countries

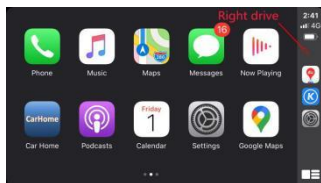

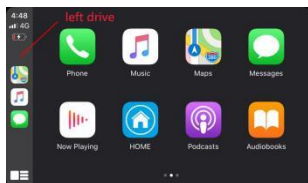

Drive setting

Different countries have different driving regulations, The device can set different driving directions to make the operation more convenient

Tap on Settings-->system-->Drag down to open another page-->Driving---Right drive

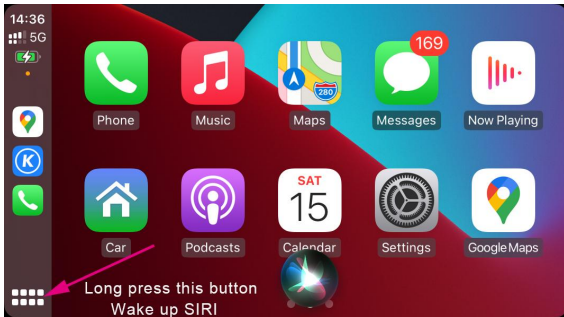

Left drive and Right drive

SIFI voice control

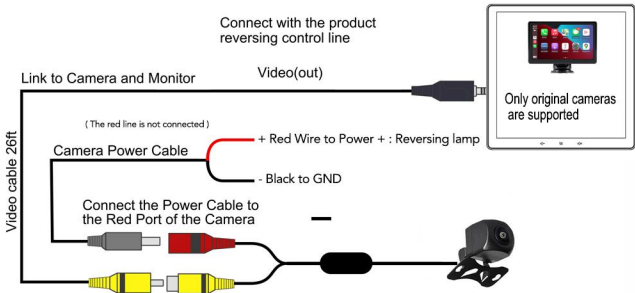

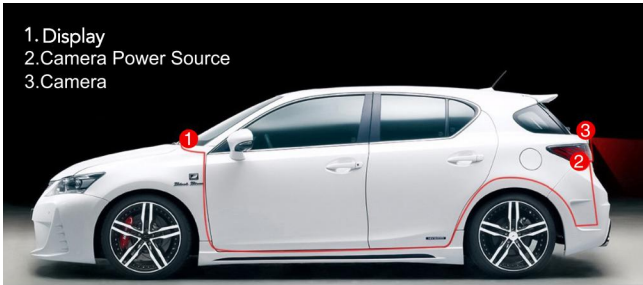

When you connect the carplay, you can control the navigation by voice, in the map software

You can also wake up Sifi and ask him to do something for you

- * Show me the map
- * How's the weather today
- * Navigate home
- * play music
- * Call up

reverse camera

The camera is not a standard accessory, it is optional,
Only original cameras can be supported

Bracket installation

The best way to install the suction cup bracket is on the front windshield

NOTE: If the center console is not flat, the suction cups may not work,

You can use a 3M circular disc to place it on the center console surface and then install the suction cup

Common problem

1. The FM receive has poor signal and noise interference ?

Answer:

please avoid using the channel to be occupied by the FM station

2. Wireless Carplay often disconnects or doesn't work?

Answer:

When connecting to carplay, do not connect the phone to other wireless networks to avoid carplay disconnection.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
