

How to pair your TELUS Indoor camera device to the SmartHome+ app

<p>Step 1. Initiate device pairing process</p>	<p>Once inside the SmartHome+ app, you will be met with a prompt to add your devices. Click the Add Camera button to begin the Camera pairing process.</p>  <p>Select the Add Camera button in the purple text to begin onboarding your TELUS camera device.</p>
<p>Step 2. Scan device QR code</p>	<p>You will be prompted to scan the QR code on your device. Allow the SmartHome+ app to access your camera by following the on screen prompts, and then scan the QR code on the back of your device or on the packaging.</p>

	<div data-bbox="386 214 848 818">  </div> <div data-bbox="861 191 1312 818"> <h3>Scan QR code</h3>  <p>You'll find the code on the side or back of the packaging, on the device itself, or on some components inside the box.</p> <p>Ensure the QR code is in focus, well-lit and free of any obstructions for a smooth scan.</p> </div> <p>Scan the QR code on your device using your phone's camera.</p>
<p>Step 3. Begin installation</p>	<p>For physical installation instructions (DIY), choose Begin Installation:</p>

	<div data-bbox="508 240 720 492">  </div> <div data-bbox="407 553 823 587"> <p>Let's install your Indoor Camera</p> </div> <div data-bbox="396 618 835 747"> <p>The DIY installation guide will help you setup your Indoor Camera step by step. Installation times vary based on the location where the camera will be installed. Standard installation takes 15 - 30 minutes.</p> </div> <div data-bbox="472 820 739 902"> <p>Begin installation</p> </div> <div data-bbox="480 941 730 967"> <p>Device already installed</p> </div>
<p>Step 4. Confirm Package contents</p>	<p>Verify that you have everything mentioned in the list and hit "Continue"</p>

	<h3>What's in the box</h3> <p>Before you begin, unbox your Indoor Camera and identify all of the components.</p> <ul style="list-style-type: none">• Indoor camera device<ul style="list-style-type: none">◦ With integrated stand• Magnetic ring• Adhesive ring• Wall anchor• Self-tapping screw• USB-PD AC/DC Adaptor• USB-C cable 1.5m <div>Continue</div>
Step 5. What you'll need	Verify that you have everything mentioned in the list and hit "Continue"

	<p>What you will need</p> <ol style="list-style-type: none"> 1. Smartphone or tablet 2. 2.5 Mbps upload Wi-Fi coverage in the install location <p>Optional Wall Mounting</p> <ul style="list-style-type: none"> • Screwdriver, drill, pencil, 6mm (1/4 inch) drill bit <div data-bbox="493 459 726 532">   </div> <hr/> <div data-bbox="411 610 819 675">     </div> <div data-bbox="552 881 688 938"> <p>Continue</p> </div>
<p>Step 6. Select a location</p>	<p>Select a location</p> <p>Find an outlet near your chosen location and plug in the camera. Choose a location with the following:</p> <ul style="list-style-type: none"> • Indoor power outlet nearby • Good Wi-Fi signal strength • Clear view of the area <p>Note: For wall mounting installation, see instructions on the next screen.</p>

Step 7. Optional Mounting instructions

Mounting the camera (Optional)

There are two ways you can mount the camera to a wall

You can attach the camera to a wall in two ways:

1. Attach the magnetized ring with the double sided adhesive provided to a wall.
2. Use the wall anchor and self-tapping screw provided to secure the camera in place.

Continue

Step 8. Test Wi-Fi Requirements

Check Wi-Fi speed

The TELUS Indoor Camera requires a minimum Wi-Fi signal of 2.5 Mbps **upload** speed to operate.

Use the link below or visit telus.com/SpeedTest in a browser to determine your Internet speed. Ensure the phone or device running the test is connected to your home's Wi-Fi network and is positioned where the camera will be installed.

If your bandwidth is too slow or Wi-Fi signal is missing, contact your internet service provider. You may need to increase your upload speed or improve your home's Wi-Fi coverage.

TELUS Speed Test

Continue

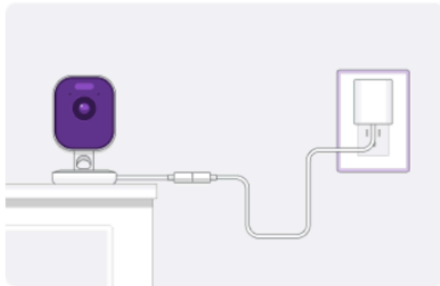

Step 9. Turn on the camera

Turn on the camera

1. Connect the power cable to the camera and USB-C power supply
2. Plug the power supply into the power outlet and wait for the LEDs to turn solid green

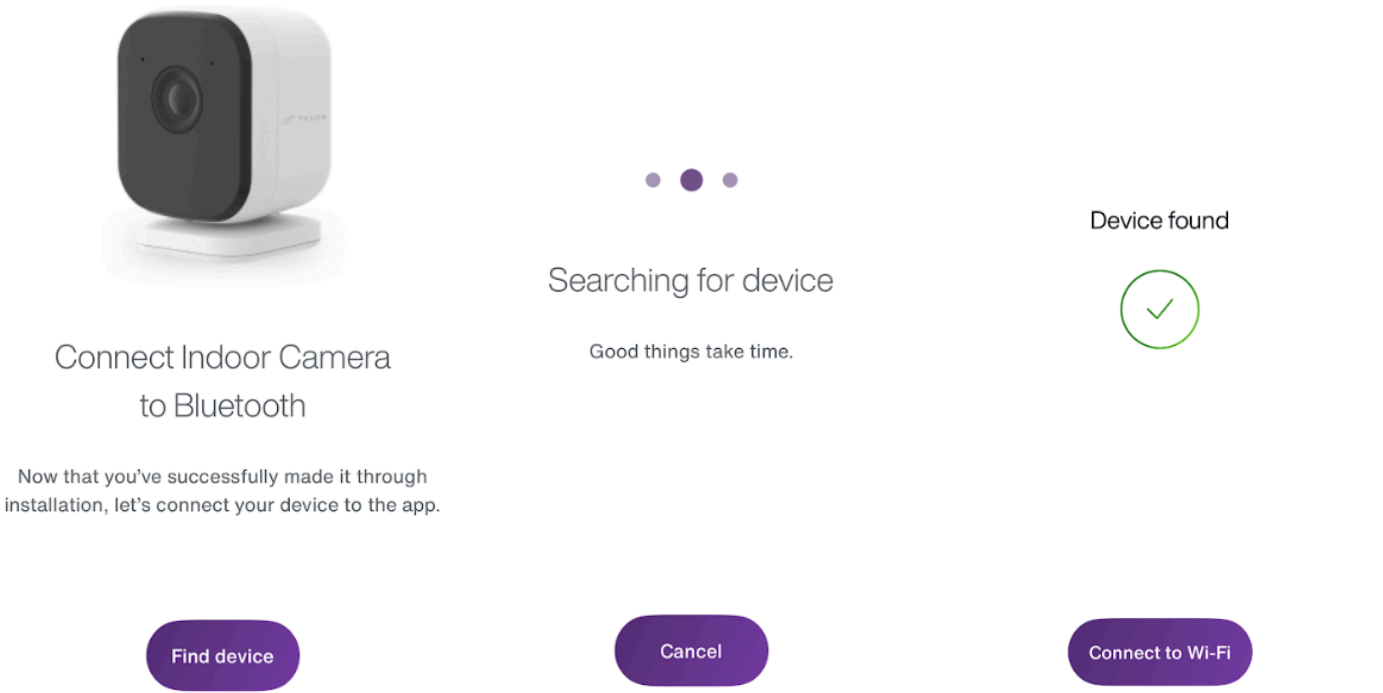

LEDs not solid green?

Disconnect and reconnect camera from power. As soon as the Red LED comes on, push and hold reset button located under the flap below the camera. Release the button only after LEDs flash purple.

Continue

Step 10. Wait for LED light	<p>Wait for LED light</p> <p>Camera will show a solid green LED when configuration is complete.</p> <p>Congratulations! Your Indoor Camera is now ready to pair.</p>  <p>Continue setup</p>
Step 11. Connect to Bluetooth	<p>Once your camera has been installed, you will be prompted to pair your device via Bluetooth. Follow the on screen prompts to do this. Ensure your camera is on and ready to pair with Bluetooth. Successful Bluetooth pairing will then prompt you to connect your device via WiFi. Select the Connect to WiFi button to continue.</p>

	 <p>Connect Indoor Camera to Bluetooth</p> <p>Now that you've successfully made it through installation, let's connect your device to the app.</p> <p>Find device Cancel Connect to Wi-Fi</p>
Step 12. Connect to Wi-Fi	<p>Once the device is paired to Bluetooth the next step is to pair your device via WiFi. The app will search for your local WiFi networks. Select your preferred network and input your network access credentials. Following successful authentication to your WiFi network, your device will now be paired. Select continue at the bottom of the Device Connected screen to continue.</p>
