! WARNING

For your safety, the driver should not operate the controls while driving. Also, while driving, keep the volume to a level at which external sounds can be heard.

precautions

1. when the interior of the car is extremely cold and the unit is used soon after switching on the heater and moisture may form on the unit and proper playback may not be possible.

2. This unit uses precision parts and components for its operation. In the event that trouble arises, never open the case, disassemble the unit, or lubricate the rotating parts. Contact your service center.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement:

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance between 20cm the radiator your body.

Wiring- Back Panel:

A1: Parking Sensor Control Wires +12V	Pink
A2: Parking Single Check	Brown
A3: KEY	Orange/Black
A4: B+	Yellow
A5: Power Antenna/amp lifier Turn On	Blue
A6: Head Lamp	Orange
A7: ACC	Red
A8:GND	Black

B1: Right Rear Speaker+	Purple
B2: Right Rear Speaker-	Purple/Black
B3: Right Front Speaker+	Gray
B4: Right Front Speaker-	Gray/Black
B5: Left Front Speaker+	White
B6: Left Front Speaker-	White/Black
B7: Left Rear Speaker+	Green
B8: Left Rear Speaker-	Green/Black

⚠ Please check the speaker line carefully before installation. If any grounding or touching, please connection again, otherwise the unit will be burned.

General operation

Note: If there is no any device connection, some icons like camera will be showed no device click is invalid in this case. Display setting is invalid if there is no audio or video playing

Radio

- Radio Region-Set the unit for one for the following regions: Europe, America, China, Russia, Japan, RDS(on/off)

Multimedia player

- Support lots of video and audio formats
- Subwoofer-Turn the subwoofer Output On or Off
- EQ-setting :pop ,ROCK ,classic ,Jazz or off

Time

- slide the figures in the set time interface

Language

- * Language-Select desired language(English, Spanish, Deutsch, Russian, portuguese , French, chinese, etc.

camera input

- Connect the camera with this device, can be auto detected brake signal when reversing.(Note camera is not included)

car logo

- Preset car logo to match your car brand

steeringwheelcontro

- Set the function button on you steering wheel via the system learning settin

calibration

- Calibration Press the enter of the "+" as the indicated on the screen to calibrate the touchscreen

powersavingmode

AUX Input

- Connect an optional audio video source to the Aux input

FMTUneroperat ion

Radio interfaceRDsturnonfunction

TouchRadio icon inmain interfaceorpressmodekey inpanel/SRkey in remotecontrollertoswitch to radiomode.

Multimedia player

Support avarity of audio and video formats

Music interface

The system will automatically read certain devices inputted into the unit
The user can directly click options in directory menu to perform play.

Note: Sliding the controlling bar in the bottom to show the next page.

AUX in(Auxiliary device input

Click " AUX In " in from the main interface SRC key in remote control to switch to AUX in Mode. AUX in enables external media sources to connect to the system, like camera, video games, (controlled by remote control} etc. No auxiliary device input shows at the below picture. Connect external devices through the 3.5mm auxiliary audio/video input. It can display the corresponding picture as the output video.

Rear view Camera

Auto operation: After connect with reverse camera, it will auto-detected the reverse signal and show the reverse pictures. The system will swift to any mode to rear view lens mode automatically. When reverse is over, the system will come back to previous mode.

Connect to the unit via your mobile phone through the standard port and transfer the picture and audio from the phone to the device. You can control the phone through the device's screen , such as receiving calls, dialing calls, listening to music, watching movies or photos.

Connect your device using the with original cable your phone came with, then touch the icon to open the menu, and follow the instructions.

setting

Note:sliding the bar on the left side to see more optional settings

Connect the steering wheel control cable, and click the corresponding key to activate the function.

After entering into the steering wheel control interface, then keep pressing the steering wheel "VOL+" button in your car, at the same time click "VOL+" in the interface, it will be selected, then it is finish this setting. Click other buttons according this method, the steering wheel function can be used.

Troubleshooting

Phenomenon	Reasons	Solutions
Normal		
Not operating	Fuse of machine power supply and auto vehicle battery is burnt, Voltage of power supply is overloaded Automatic protection system avoids fault due to illegal operation Wrong pin assignment ISO connector	Change for fuse of the collect types; Adjust voltage; Reset the system by pressing the Resetkey Check the wiring diagram
Remote control doesn't work	Battery is out of power; Battery is not placed correctly	Change new battery; Reinstall battery
Noor low sound	Disconnection; Volume setting is low volume; wrong connection of Silence; Loudspeaker fault; Volume balance setting bias Earthing in loudspeaker connection	Check the connection; Increase the volume; Reconnection the silence wire complied with the installation instruction; Change for a new loudspeaker; Adjust the volume balance setting to middle place;
Machine reset by itself when it is shutdown	Connection of ACC and B+ is not correct.	Check and reconnect ACC and B+
Turnover screen		
Turnover screen does not open automatically.	Auto Open of turnover screen setting is OFF.	Auto Open»ON
No image	Connection of brake wire is not correct; Not brake state	Connect brake wire with cathode of power supply correctly; Keep brake state after car is placed safe.
Unstable output of images	does not correspond with the present system video setting; Video signal line is not connected correctly.	Adjust system video setting; Check and make sure of the connectivity. Unsupported code
Images being stretched or compression	Inappropriate image proportion setting	Adjust image setting
Trouble		
Radio		
Weak signal	Auto antenna does not reach out completely LOG function is under working state	Connect auto antenna line correctly; Close LOG function.

Note: This device is a Mechless unit.

Systematic Parameter

Specifications

Working voltage: direct current 12V

Working voltage range: 10.8V-16V

Maximum working electronic current: 10A

Installation angle: less than 30 degree
tilted the front side and backside

Power output: 4X80 W

impedance 4ohm

SNR: 70dBA

Frequency Response: 20Hz-20kHz

Video

Standards: NTSC. PAL (Auto recognition)

Output: 2 Vp-p(75ohm)

Input: 1Vp-p(75ohm)

FM Radio

Frequency modulation:
87.5 MHz ~108.0MHz (Europe)

Flexibility (-30dB):10dBu
SNR(- 50dB):15dBu

Frequent sound range:
30Hz-15kHz (+3dB)

AM Radio

Frequency range:
522KHZ-1620KHZ (Europe)

Sensitivity (SN=20dB):20dBu

Image rejection: 60dB
Frequency response:
50HZ-2KHZ(+3dB)

Display

Response time: up=30 millisecond.
Down=50 millisecond

Angle range: depression angle=65°
elevation angle=40°
Left vision=65 right vision=65

Environment temperature

Operation temperature:-20-+70°C

Maintenance temperature: -30°C-80°C

Operating humidity:45%-+80%°C
(relative humidity)

Maintenance humidity:30%-90%
(relative humidity)
