MIMOUSE

MiMouse EM4 AI INSTRUCTION MANUAL

Important Notes

- Please read the instructions carefully before using this product.
- To ensure your safety, please read the precautions carefully before using this product.

Product Introduction

Windows PC Installation Tutorial

- Turn on the mouse power switch, take out the receiver and plug it into the USB interface of the computer.
- For the first time, press the mouse "Speech button" for 3 seconds, and the computer will automatically open the driver download page, select windows system software download, and the installation is completed.
- Click the 'AI button' to automatically download the M-AI software, wait for the download to complete, and follow the steps to click install.
- Use smart features. AI button, long press: smart writing, click: enter AI interface.

Mac PC Installation Tutorial

- Turn on the mouse power switch, take out the receiver and plug it into the USB interface of the computer.
- Access <https://global.mimouse.com/download.html>, select the software download for Mac system, jump to APP Store, install and open the driver software.
- Agree to turn on microphone access and click System Preferences > Security and Privacy > Privacy Set auxiliary functions, input monitoring and screen recording permissions (please delete the old version of mouse software first Permissions), which can be used when completed.
- Use smart features. AI button, long press: smart writing, click: enter AI interface.

Bluetooth Connection Method

- Press the 'Mode switch button' briefly to switch to Bluetooth 1 or Bluetooth 2, and the upper status indicator will be blue or purple.
- Long press the 'Mode switch button' for 3 seconds, and the blue light at the rear of the mouse will flash rapidly, indicating it is waiting for Bluetooth pairing.
- Turn on your computer's Bluetooth, search for and connect to EM4 AI.

Connect three computers

Computer	Connection method	
The first computer	Receiver	Press the "Mode switch button" to switch between three computers
The second computer	Bluetooth 1	
The third computer	Bluetooth 2	

Indicator Description

Charging	The charging red light remains constant, turns off when fully charged.
Low battery	If the battery is below 20%, the blue light will slowly flash as the mouse is powered on/woken up, and it will turn off after 30 seconds.
Mode	Red light indicates receiver connection; Blue light indicates Bluetooth 1 connection; Purple light indicates Bluetooth 2 connection.
Pairing	The blue light rapidly flashes while waiting for pairing and turns off after pairing or timing out.

- Note**
- You can check the mouse battery level in the Mimouse Driver software interface.
 - Use the included 5V-1A charger for charging.

Specification

Name	AI mouse
Model	MiMouse EM4 AI
Size	120mmx65mmx37mm
Weight	92g
Charging port	Type-C
Type	2.4G Wireless; Bluetooth
DPI resolution	800-4000DPI multi-speed adjustable
Battery capacity	600mAh (Lithium-ion battery)
Support system (Compatible with)	Windows 7/8/10/11, MacOS 10.15 and above (Bluetooth connection does not support windows7 operating system for the time being, Apple's system currently only supports some functions)

Packing List

USB receiver is unresponsive	Poor contact with the computer USB interface	Plug the USB receiver into another USB port on your computer
The mouse cannot connect to computer's Bluetooth	The Bluetooth version of the computer is too low Windows 7 does not support Bluetooth connections	Connect to your computer using USB receiver mode
The cursor cannot move	The mouse is not turned on The mouse battery is low The mouse did not connect successfully to the computer	Turn the mouse on Use it after charging Reconnect the computer according to the Bluetooth mode and USB receiver pairing method
Abnormal functions such as voice recognition	Software download error The driver software is not open	Retry after downloading the correct driver software Retry after starting the driver software
Inaccurate voice recognition	The computer is not connected to the internet or has poor network quality Noisy surroundings Speaking too quietly or too loudly Speaking too fast and unclearly Farther away from the mouse	Check your computer's network to ensure it's functioning properly Use in a relatively quiet environment Speaking at a normal volume Speak at a normal speaking rate Try again within 65cm of the mouse
Voice typing is not possible in some software	Restricted by usage rights	Exit the Mimouse driver software and restart it with administrator privileges
Prompt malicious programs when installing driver software on Apple computer	The driver software is not on the Mac APP Store	On the Mac, click System Preferences > Security and Privacy > General > Still Want to Open
Apple Computer Can't Type	Mimouse software needs to obtain Apple system permissions	Set accessibility, enter listening, and screen recording permissions in System Preferences > Security and Privacy > Privacy. (Please delete the permissions of the old mimouse software first)

Re-pairing method when the receiver loses fit

- Turn off the mouse power, then press and hold the voice key while turning on the power switch.
- When the pairing indicator flashes blue, insert the receiver into the computer's USB port.
- Pairing is successful and the indicator turns off.

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

*RF warning for Portable device:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
