FOCUS V
WIRELESS POWER BANK

USER MANUAL

Thank you for choosing the FOCUS V Wireless Power Bank. Please read this manual and follow all operating instructions.

This device is a wireless charger and high capacity portable power bank designed to work with your wireless compatible FOCUS V products as well as other wireless devices that follow the Qi charging standard. It also charges devices via wired USB power while offering thermal and over voltage protection.

Fully charge your FOCUS V Wireless Power Bank battery before using (up to 8 hours) using an AC adapter (not supplied) and the USB cable supplied. Supported charging input voltage is 5V - 14V. The LED Display indicator will show current charge level:

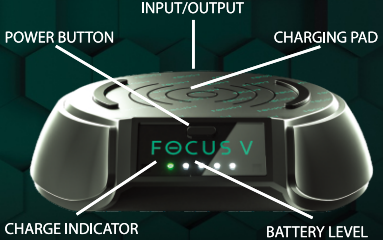

1 LED: 25%
2 LED: 50%
3 LED: 75%
4 LED: 100%

To turn the charger ON/OFF, press the power button twice. The LED Display indicator will show you remaining battery capacity. A GREEN LED indicates a device is charging, RED LED indicates no device is charging.

To charge a wireless device, place it in the center of the charging pad. Note: Properly seat and center the device you are charging to maximize charging speed and efficiency. The device will auto shutdown if not in use.

Note: Do not charge any devices while power bank is being recharged to preserve the battery life span.

Keep away from heat sources and liquids. Avoid dismantling, dropping or heavy impacts. Fully charge the power bank at least once every month.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: -Reorient or relocate the receiving antenna. -Increase the separation between the equipment and receiver. -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. -Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
