

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 This photograph shows the internal components of the EUT housing. A green printed circuit board (PCB) is visible, featuring a microcontroller, a USB port, and various electronic components. The PCB is connected to a small black battery via red and black wires. The housing is white plastic, and a black ruler is placed next to the assembly for scale.
EUT Housing and Board View 2	 This photograph shows the internal components of the EUT housing from a different perspective. The green PCB is visible, showing the microcontroller, USB port, and other components. The battery and its connecting wires are also visible. The housing is white plastic, and a black ruler is placed next to the assembly for scale.

Solder Board-Component View 1	
Solder Board-Component View 2	

Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) component, labeled 'View 3'. The board is irregularly shaped with several circular holes. It is populated with various electronic components, including a central integrated circuit (IC) and several smaller surface-mount components. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the board's length spanning approximately 100 mm.
Solder Board-Component View 4	 A photograph of the same green PCB component, labeled 'View 4'. This view shows the opposite side of the board. It features a large, rectangular component, possibly a connector or a large IC, and several other smaller components. The board is again placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the board's width spanning approximately 100 mm.
