Connect power

Connect the device to the power supply and wait for about 1 minute.

Warning:
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This device complies with the safety requirements for compliance with the user's country. Changes to safety rules are approved by the party responsible for compliance with the user's country.
To operate this equipment, users need to comply with the limits for a Class B digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential environment. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the distance between the equipment and the receiver.
- Connect the equipment to an electrical outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
Note: This device and its accessories must be used in accordance with any other notices or instructions.
FCC Exposure Statement
To ensure compliance with FCC's RF Exposure guidelines, this equipment should be installed and operated with minimum distance of 20 cm from the radio part body. This error and its accessories must not be installed or operated in conjunction with any other antennas or accessories.

D Common problem

Problems	Solution
What should I do if the device is unacceptably added?	Check whether the WiFi password is correct, and the network can be connected correctly. Don't add the camera, and add a regular power connection.
How to download video?	Click the "Record Screen" button during playback, and click the red button after recording, and the video file will be saved to the phone.
What if the display device is blurry?	First confirm whether the power supply and network are normal, and there is no problem with the power supply of the camera and recording. If this camera is still blurry, download the app.
The memory card is full, what should I do?	No manual processing is required. When the remaining memory card capacity is less than or equal to 10%, the camera will automatically overwrite the oldest video file.
The memory card shows no memory card or abnormal.	If the camera does not support the memory card, it needs to be replaced with a memory card that supports the camera. The camera card must be formatted after the camera is replaced. Please refer to the user manual for the correct operation. If the card is still not recognized, the card may be damaged or the camera theory. Contact the supplier to replace the device.
What should I do if I cannot receive the warning message?	Confirm whether the system has turned off the message push permission of WeChat. If it is turned off, please go to the "Message notification" permission of the phone settings and check whether the message push is turned off in the device settings. Contact the supplier to replace the device.
