V2 THE SINGLE
SIDED STEREO
HEADPHONE

HEAR STEREO SOUND
WITH JUST ONE EAR

- Thank you for purchasing a Yuni V2 (or for having a friend or relative who did)! As a small business, we thrive on word of mouth and your support. Please spread the word to all your friends, family, classmates, and coworkers, and let your contacts know about us on social media. It would mean so much to us!
- Prolonged exposure to sound intensities above 85 decibels can lead to permanent hearing damage. Please do not listen to music at high volumes through the Yuni V2 - we care about your hearing!
- When lost in a world of single-sided stereo sound, it can be hard to hear cars, bicyclists, runners, etc. Please be aware of your surroundings when using the Yuni V2!

Short Press: Previous Track

Long Press: Volume Down

Play/Pause

Short Press: Next Track

Long Press: Volume Up

To connect via Bluetooth to your device, charge the Yuni V2 fully (the red charging light will turn off when fully charged) and switch it on. The indicator light will blink red and blue for Pairing Mode. Find the Yuni V2 on your device's Bluetooth menu. When connected, the light will flash blue. The Yuni V2 does not need to be charged or switched on to connect to your device via the included 3.5mm cord.

FCC Statement

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has evaluated to meet general RF exposure requirement. The device can be used in portable exposure without restriction.
