Blue Tooth Self-Timer Instructions for Use

1. Open the battery cover on the back of the Bluetooth self-timer, insert the battery CR2032, and it will work. Press the power on/off button, the blue LED will flash, it can work normally when in use, when not in use, when disconnected, the product will automatically enter the sleep mode, simple to use, energy saving and environmental protection.

2. Turn on the Bluetooth of the mobile phone, search for the Bluetooth device, and after discovering the Bluetooth selfie device, click to connect and pair, and it can be used after the connection is successful.

 When you need to pair it with another phone, just press and hold the photo button (3 seconds) or so. Let it follow a phone to unbind it first. Then search for Bluetooth device connection pairing, turn on the camera, you can use it, and take pictures freely.
There is no need to switch buttons between IOS system and Android system, as long as you connect and pair the corresponding mobile phone, you can use the Bluetooth self-timer to take pictures.

FCC Warning Statement:

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
