Dear Sir/Madam,

Subject: **Declaration Letter about Identity of Products**

*WE (Toplight Sensor Technology (Xiamen) Co., Ltd.) HEREBY DECLARED THAT

The TRFK345 is available in three different housings. They differ slightly in appearance, but are made of the same material (ABS) and have the same internal structure. The main difference in appearance is the screw clips.

In order to adapt the module to different mounting angles and positions in different products, the 2 screw clips are designed for different positions on the housing. All differences do not affect the operation and function of the module.

*Except that above difference deviation, are identical with the original product as follows:

Note: The definition of identical should be “**electrically identical**”. A device will be considered to be electrically identical if no changes are made to the devices’ schematics, board layouts, component layouts, chip sets, resistors and all other electrical aspects of the device are identical.

Sincerely,

| | |
