

**D5**

**Quick Start Guide**

## 1. Appearance description

### KEY DESCRIPTION

Power Key: Hold down for 3 seconds to turn on/off. Hold down for 10 seconds to reset.

Direction Key: up, Down, Left And Right

Return Key: Return to the previous screen or return to the main screen

APP Key: program Associated Shortcuts

FN Key: Custom function keys can be set by software

Aa Key: Case Switch, Press

## 2. battery charge

Use the travel charger

Insert the small end plug of the USB cable into the host TYPE-C connector, insert the big end plug of the USB cable into the travel charging plug, and then plug the travel charging plug into the power socket for charging.

Charging with a USB cable

Plug the small end plug of the USB cable into the host TYPE-C connector and plug the big end plug into the computer's USB port for charging.

## 3. Install SIM card, memory card

This product uses a Nano SIM/UIM card. Push the Nano SIM card metal contacts all the way down into the slot, paying attention to the chamfering direction.

Push the metal contacts of the Micro SD memory card down into the slot, paying attention to the chamfering direction.

# FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Specific Absorption Rate (SAR) information:

This D5 meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement

- This radio is designed for and classified as "General population/uncontrolled Use", the guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. The exposure standard for wireless radio employs a unit of measurement known as the Specific Absorption Rate, or SAR, the SAR limit set 1.6W/kg.
- Body-worn operation; this device was tested for typical body-worn operations with the back of the handset kept 10mm for body worn. To maintain compliance with RF exposure requirements, use accessories that maintain a 10mm for body worn. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with RF exposure requirements, and should be avoided.
- The highest reported SAR value for worn on the body is 0.785 W/kg, Simultaneous Reported SAR 1.372W/kg. .
