DECLARATION REGARDING BLUETOOTH

Date: 03/22/2024

FCC ID: 2BFC6-LIGHTNINGH

IC: 32232-LIGHTNINGH

To whom it may concern,

This module is a System-On-Module based around the Qualcomm SDx845 platform and WCN3990 transceiver, which are capable of 2x2 MIMO WLAN functionality for which this approval application is submitted.

Aside from the WLAN capabilities, these components are also capable of supporting Bluetooth technology through the same signal chain which is not necessary for this product. This feature is hence disabled by software.

Sincerely,
Robbe Derks
