4. Troubleshooting

1. Can't connect to your Wi-Fi network.
Make sure you entered the correct Wi-Fi password during the Wi-Fi setup. Check whether there are any Internet connection problems. If the Wi-Fi signal is too weak, reset your Wi-Fi router and try again.

2. If you fail to bind, you will need two phones, one to set the hotspot and the other to connect the hotspot and add the device through the app. If the device is successfully added, the device is normal. The problem may be in the router, you need to check your router Settings to see if there are MAC and DHCP restrictions.Lumary products do not support 5GHz networks.

3. If you have any questions.You can contact us via our after-sales email or leave a message on our official social media account.

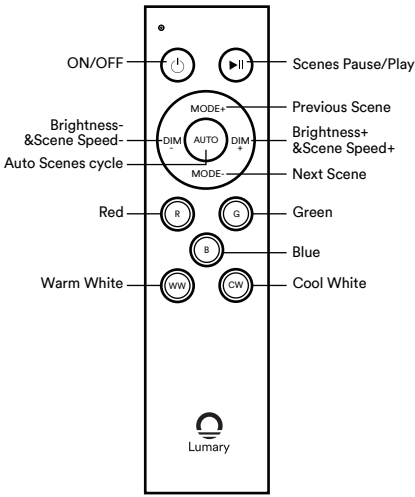
Remote Control



The remote control can control both networked and non-networked lights.

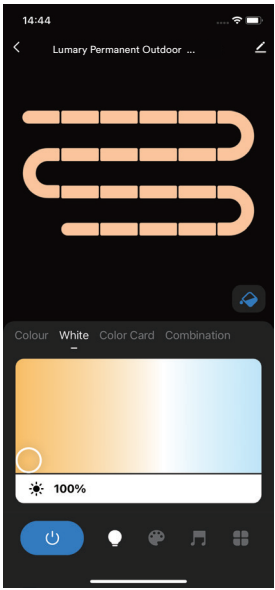
1, When the light is not networked & networked, you need to turn off the power of the device for 5 seconds, then turn on the power of the light again and press the on/off button, the light appears to breathe or blink to complete the pairing.

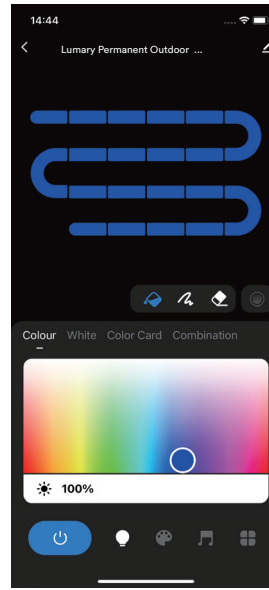
2、If the pairing is not successful, please repeat the steps.

App functions

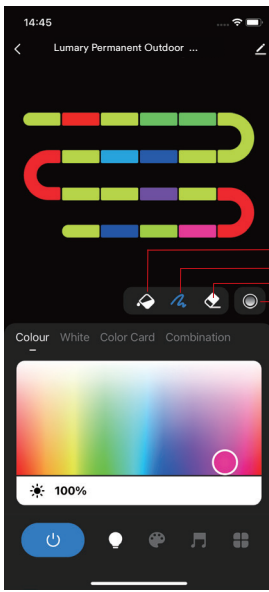
When you enter the App, you can see five sections: On/Off, Colour, Scene, Music, Plan. Detailed function description please check below:

1. On/Off. Analog key switch, control the switch of the whole set of Eaves lights.

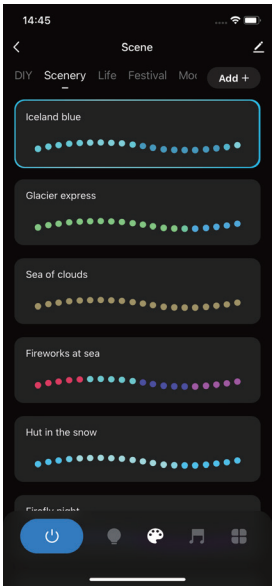


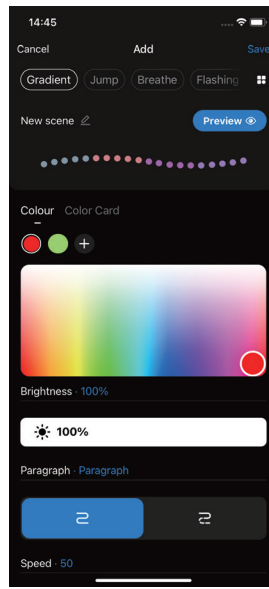


2. Colour. After the successful connection, enter this Colour UI page by default. This UI page is with 3 icons and 1 digital display.



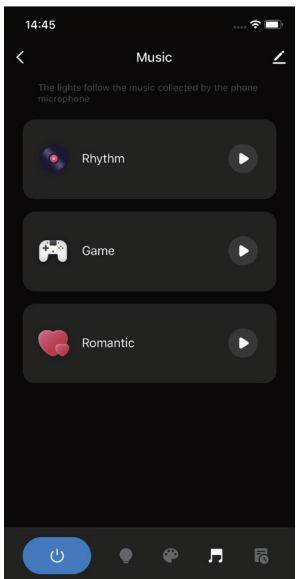
3. Scene. It has 44 different scene mode.Supports DIY 50+ scenes, edit your favorite scenes .
(Note: When you're done editing, be sure to preview and click Save. Next time you open this page, the DIY scene will also be saved.)

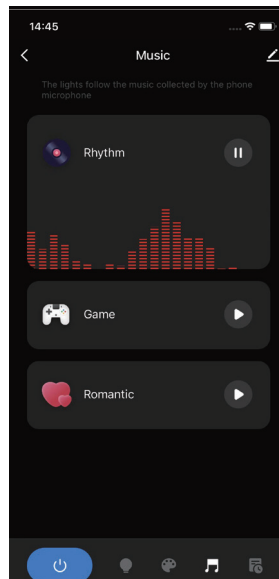




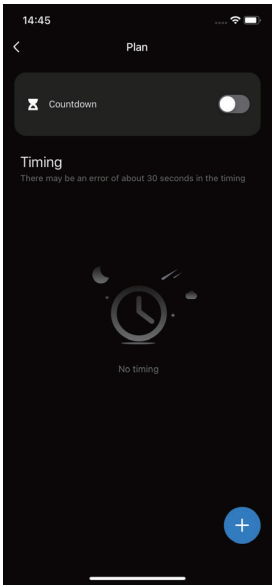
4. The music function requires access to the music UI, which recognises external sounds through the phone's MIC, and realises that the rhythm of the light changes along with the sound through the app's algorithm.

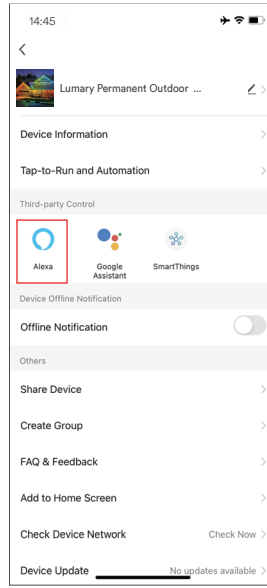
Tip: If you leave the music rhythm mode, the rhythm will stop. If the phone rests on the screen, the lights will stop. In order not to violate the privacy issue.





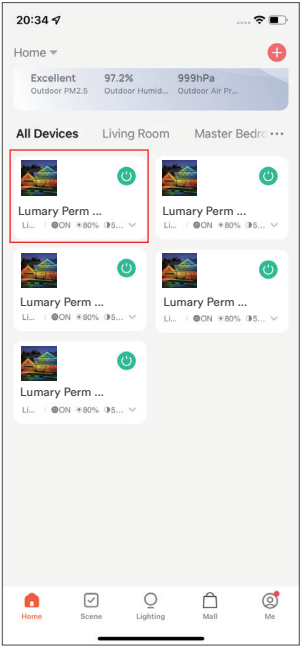
5. Plan. The owner can freely set the on/off time of the string light every day.

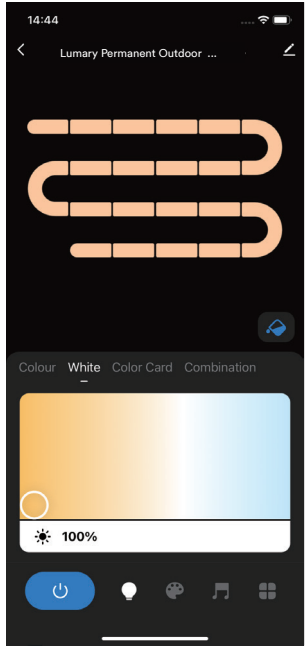




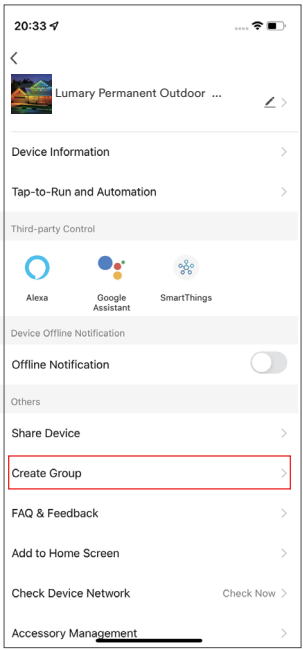
Group Control

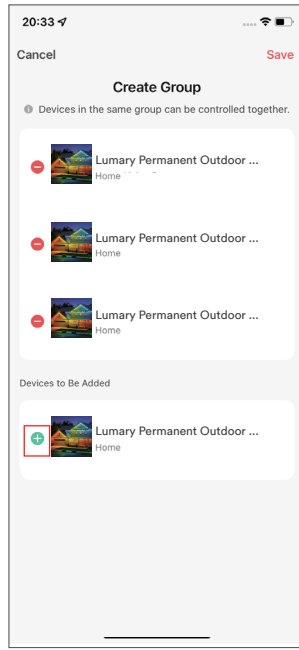
1. Log in to Lumary App, tap the smart device and enter into, click" ✎ " in the top right corner.



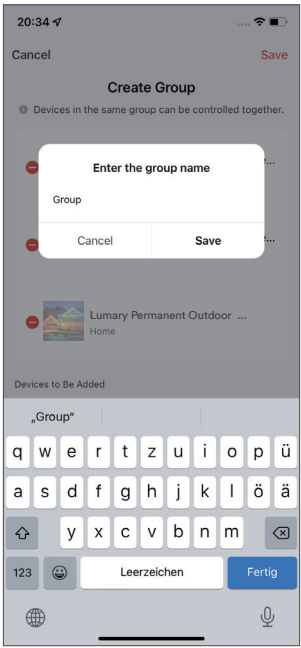


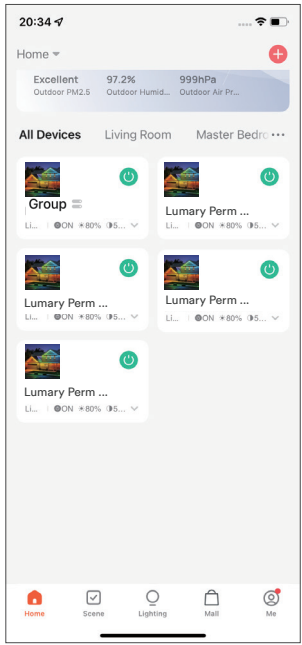
2.Click "Create Group", then select a device and save.





3.You can reset the group name and save it, and the group can control devices.





FAQ

1. Why does the flickering occur with Lumary products?

Lumary's products are factory set to the default network configuration. If the device has not been connected to the network, it will flash for three minutes each time it is powered on.

If the device is connected to the network, it will stop flashing and will automatically connect to the network when it is switched off and on via the wall switch after 15 seconds.

2.Can I share with family and friends?

Yes, you can share access to your Lumary devices. In the Lumary App, from your main device list, click on one of the devices press the "⌿" button on the top right and click on "Share Device" to give or revoke sharing permissions. In order to share, the other user should already have downloaded the Lumary App and registered an account.

3.Can I group multiple Lumary devices together?

Yes, you can group multiple same-type devices by room, location, or however else you want. The same devices can be in multiple groups. For example, if you create a group for "Bedroom" and another group for “Entire House" ,your Bedroom lights can be included in both groups. From your main device list, click on one of the devices you want to group, press the "..." button on the top right for advanced settings, and click "Create Group" .You'll be able to name a new group and choose which devices you'd like to group together.

4.How many devices can I control?

- The maximum number of timers that can be added to a single device: 30
- Maximum number of devices that can be added in a single home: 120

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

and obtaining a separate FCC authorization.

RF Exposure
