G. The red light flashes once every 3 seconds when the battery is low
④ Radio microphone: the main radio location for receiving voice
⑤ Charging contact
⑥ Type-C interface: A. Connect Type-c charging cable for charging
B. Connect Type-c headset to listen back

Usage Method

(1) Connect mobile phone recording/video recording mode

Step 1: First, press and hold the microphone receiver and microphone transmitter to turn on, and the connection is successful;
Step 2: Connect the microphone receiver with the mobile phone;
Step 3: Press the transmitter to the non-reverberation state (no reverberation by default when it is turned on, if reverberation has been turned on, long press the function key to turn it off), open the mobile phone camera and other APP to record video. Note: Most Android phones cannot record with their own camera

(2) Operation mode of connecting mobile live broadcast

Step 1: First, press and hold the microphone receiver and microphone transmitter to turn on, and the connection is successful;
Step 2: Connect the microphone receiver with the mobile phone;
Step 3: Switch the microphone transmitter to the desired effect, and the mobile phone can open the live broadcast APP to carry out live broadcast with goods.

(3) Operation mode of connecting camera to record/record video

Step 1: First, press and hold the microphone receiver and microphone transmitter to turn on, and the connection is successful;
Step 2: Connect the microphone receiver with the camera;
Step 3: Press the microphone transmitter to the non-reverberation state (no reverberation by default when turning on, if reverberation has been turned on, long press the function key to turn off), and turn on the camera to record video.

Specification

Frequency: 2.4Ghz Digital Frequency
Frequency response: 20Hz-20kHz
Sampling frequency: 48kHz
Transmission range: up to 20m (w/o any obstacle)
Signal to noise ratio: ≥75dB
Sensitivity: -38dB±3dB
Battery capacity: 800mAh (Charging case)
140mAh (Transmitter)
220mAh (Receiver)
Working duration: up to 7h
Interface: USB-C

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
