

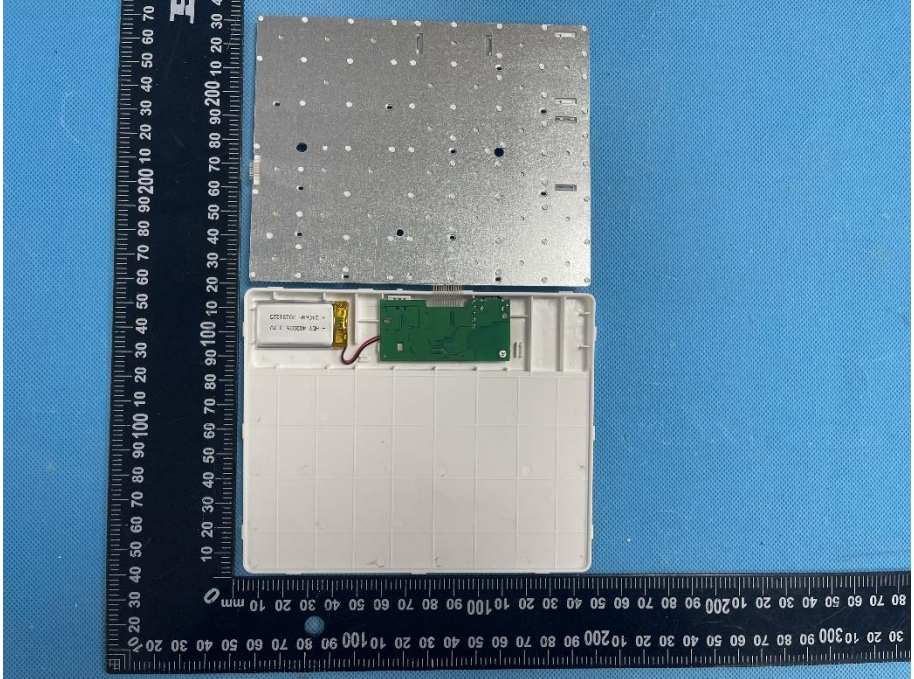

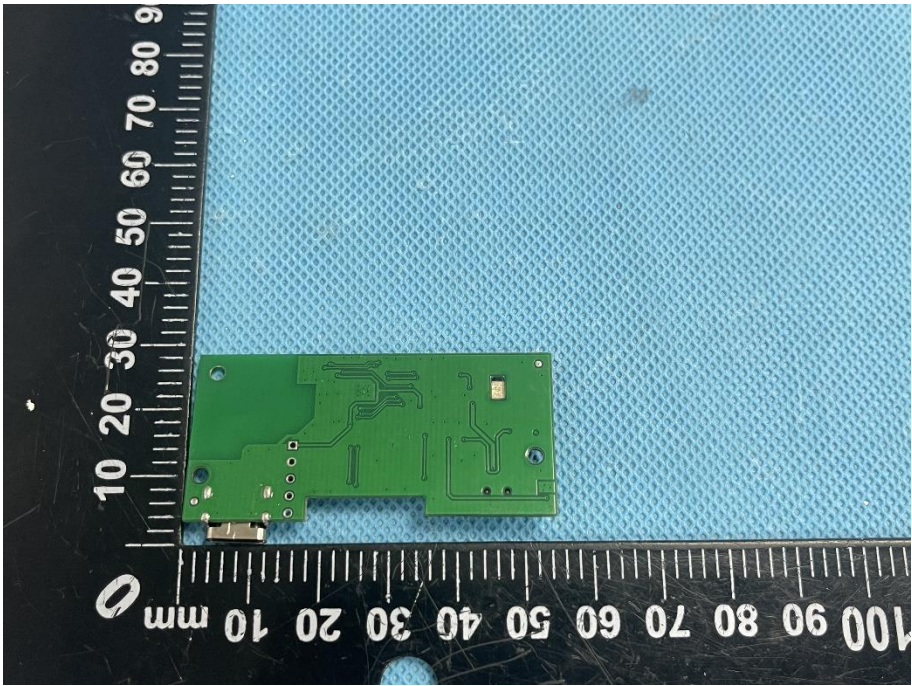

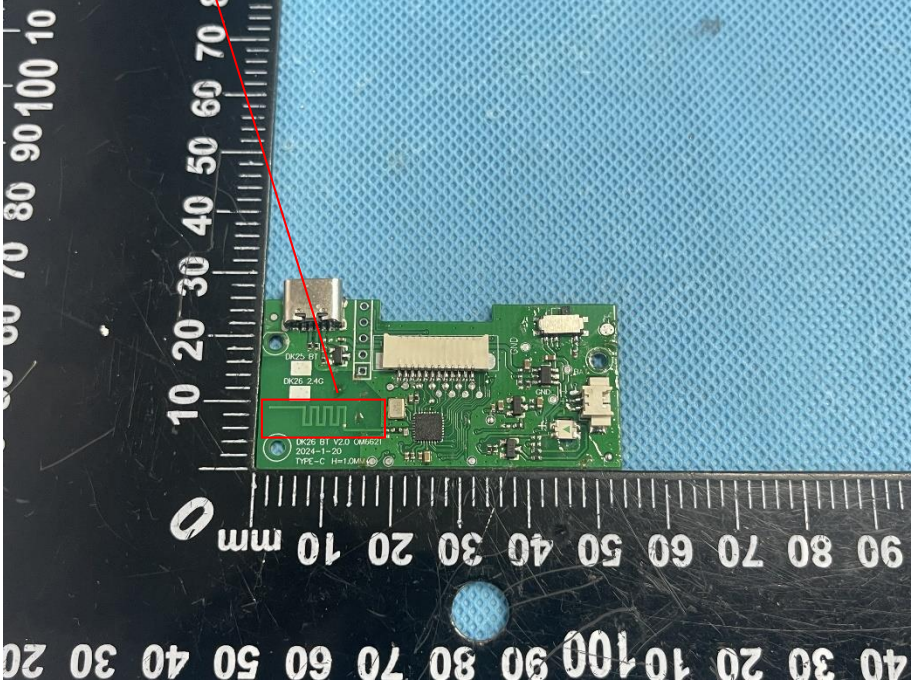

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View</p>	 A photograph showing the internal components of an EUT (End User Terminal) housing. The housing is white and partially disassembled, revealing a green printed circuit board (PCB) and a battery. A silver metal shield is positioned above the PCB. A black ruler with white markings is placed to the left of the components for scale. The background is a blue textured surface.
<p>Solder Board-Component View 1</p>	 A close-up photograph of a green PCB component, likely a USB Type-C connector, with various electronic components and solder joints. A black ruler with white markings is placed below the component for scale. The background is a blue textured surface.

<p>Solder Board-Component View 2</p>	 <p>A photograph of a green printed circuit board (PCB) component. The board is rectangular with various traces and components. It is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters, with the component spanning approximately 40mm in width and 20mm in height. The background is a blue textured surface.</p>
<p>Antenna View</p>	<p>BT Antenna</p>  <p>A photograph of the same green PCB component, viewed from the side to show its profile. The component is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters, with the component spanning approximately 40mm in width and 20mm in height. The background is a blue textured surface. A red box highlights a specific area on the board, and a red arrow points to it from the label "BT Antenna" located above the image. The PCB has various components, including a USB Type-C port, a micro-USB port, and several integrated circuits. The text "DK26 BT Y20 049962", "2024-1-20", and "TYPE-C H-1.0MM" is visible on the board.</p>
