FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.
The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Panel [8]

Precautions for wireless connection

1. Please control the distance between the wireless earphones and the phone (or other connecting devices) within a range of 1 meter, the closer the better;
2. You can place the headphones in the charging case and open the charging case cover to connect them;
3. When removing the earphones from the charging case and connecting them, make sure that the left and right earphones are connected;
4. Do not close the charging case cover during the connection process;
5. The charging case needs to have sufficient power. If the earphones cannot be turned on when the cover is opened, please put the earphones into the charging case. Close the cover and insert the charger to charge for at least one hour.

Points for attention

1. Do not use corrosive cleaning agents to clean this product;
2. Do not allow this product to be heated or placed near a source of fire, such as a cooking stove;
3. Do not expose this product to direct sunlight for a long time and avoid high temperatures;
4. Do not dispose of this product in fire to avoid explosion;
5. Do not attempt to disassemble this product for any modifications, as it does not contain any repair components!
6. Do not use this product in the rain;
7. If you do not intend to use this product for a long time, please store it in a dry environment and charge the headphones at least once a month to extend their lifespan and avoid extreme temperatures and dust.
