

Remote control

About Light-effect Key

(1) **Cyclic Mode:** Click this key will create a color temperature cycle effect

(2) **Flicker Mode:** Each click of this key can switch the light effect

When in light effect: Click the "K" key on the remote control can adjust the speed and "P" key can adjust the brightness.

If you need to close it, you can click any of these buttons (3000K, 4200K, 5500K)

Note

1. Input voltage is AC 110V, 60Hz
2. Due to the high power of the product, do not block the heat dissipation hole when using, and do not place the lamp on flammable materials to avoid fire
3. Do not use in wet places such as bathrooms
4. After use, please turn off switch on the back of the lamp and cut off the power supply.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio

frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
