## Hello

Thank you for purchasing this camera. Please read the manual carefully before using, and keep it in a safe place for future reference.

The contents covered in this manual is based on the latest information at the time of writing the manual. Due to the differences of technical development and production batches, it may be slightly different from your actual use. Please take the actual product features prevail.

## Operation Guide

This camera is required to use a Micro SD high speed card (multimedia memory card) of U3 or higher.

### Memory card instructions

- If you use a newly purchased memory card for the first time, or there are some data or images taken by other cameras in the memory card that cannot be recognized by the camera, please make sure to format the memory card first.
- Please turn off the camera before inserting or removing the memory card.
- After using the memory card for many times, its performance will be reduced. If performance decreases, you need to buy a new memory card.
- Memory card is a precision electronic device. Do not bend, drop or subject with heavy pressure.
- Do not place the memory card in a strong electric or magnetic environment, for example nearby the speakers or TV receivers.
- Do not use or place the memory card in an excessively hot or cold environment.
- Keep the memory card clean and avoid contacting with any liquid. If the memory card contacts with liquid, wipe it dry with a soft cloth.
- Put the memory card into the card holder when it is not in use.

- The memory card becomes hotter after long-term use. This situation is normal.
- If one of the following conditions occurs of the memory card, the recorded data may be damaged:
  - Improper use of the memory card.
  - Turn off the camera or remove the memory card during recording, deleting(formatting) or recognizing.

## Main Features

- >Body Waterproof design, convenient for you to record wonderful water sports. It can support underwater 30m if bundled with the waterproof case
- >Ultra HD display main screen 2.35" with touch screen, secondary screen 1.4", allowing display and playback the wonderful videos recorded
- >HD Wide angle lens
- >Support image stabilization
- >Support 2.4G/5G Wi-Fi connection
- >Support 2.4G wireless remote
- >Removable big capacity battery, convenient to replace the battery and prolong the service life
- >Support charging during recording
- >Support micro SD card max up to 512GB
- >Multiple video recording modes including 4K/2.7K/1080P/720P
- >Multiple shooting modes, such as single shot, auto etc...

## Quick Start Guide

### 3.1: Insert the battery

Press and hold the lock switch, push down to open the battery cover, and install the battery according to the marked direction. If the camera is not used for a long time, please remove the battery to avoid leakage / damage to the camera or battery power loss.

### 3.2 : Insert the Micro SD card

Before using this camera, please insert (when the camera is off) a high-speed and good quality micro SD card of U3 or higher speed. Insert the micro SD card according to the right direction marked on the camera. Please connect the camera to the computer to format the micro SD card for the first use.

Note: When the micro SD card cannot be read, please replace the memory card.

3.3: Press and hold the Power button to turn on the camera, it enters the language selection interface, then select the language you want, and enter the Date/Time/Date Format setting interface.

3.4: After the date and time setting finished, the camera enters the memory card format interface. After formatting is completed, it enters the live view interface.

Note: Please make sure format the memory card on the camera for the first use.

## FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

### RF Exposure Information

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition, compliance with exposure requirements.
