

USE MANUAL

SMART WATCH

Charging and Activation

Before using the watch for the first time, please ensure it is fully charged. If the charging icon does not appear, please keep charging for 10 minutes.

1. Use the included magnetic charging cable to attach it to the metal contact points on the back of the watch, then charge it.
2. This product does not come with a power adapter. To ensure safety, you can use a computer USB interface or a power adapter with an output not exceeding 5V \equiv 1A when charging. Please purchase a power adapter through legitimate channels and avoid using low-quality or counterfeit adapters to prevent damage to the watch, explosions, or fires.
3. Do not charge in a humid environment. Regularly clean the watch body with a dry cloth to ensure the cleanliness of the magnetic charging port and the magnetic charging cable for normal charging.

Buttons and Touch

1. Long press to turn on the watch when off state.
2. In the power-on state, Long press to display the shutdown page, and click to shut down.
3. Press once on the watch dial to enter the menu, and press the button twice in quick succession to switch the menu styles.
4. When on the other interfaces, press the button to return to the watch dial interface.

Swipe Up: Message Notifications

Swipe Left: Sports data

Swipe Right: Short cut keys and weather

Swipe Down: Control Center

App Download and Connection

1. Download and install the 'FitCloudPro' app. You can scan the QR code in this manual, scan the QR code on the watch, or directly search for 'FitCloudPro' in the app store to download.
2. Connect the smartwatch. 1) Scan the QR code to connect: After the mobile phone turns on the Wireless, enter the APP (Note: If the APP cannot be opened, please turn on the positioning of your phone and then open the APP) Click on the device -> Click on 'Add Device' -> Click on 'Scan QR Code Binding' (scan the QR code on the watch).
- 2) Manual connection: Click 'Device' -> Click Add Device' -> Click 'Search Device' (Find the corresponding item in "Settings" -> "System" -> "System Information" in the watch sliding control center Wireless name and MAC address of the device) -> Click 'Connect'.
- 3) Connect to Wireless call: Slide down to open the 'Control Center', click the 'Telephone' icon, turn on the audio mode, and then turn on the Wireless call in the mobile phone system (when the mobile phone's Wireless is turned on/off), find the corresponding Wireless name, and click 'Connect'. After the connection is successful, the call and music functions can be used normally.

Features

- On the main screen, press and hold for 2 seconds to enter the watch face switching interface, swipe left and right to switch watch faces, and click to confirm. You can push 'Custom' watch faces through the app.
- Displays the steps, distance, and calories recorded for the day. You can set step, distance, and calorie goals in the app.
- Displays the sleep monitoring status for the day, with data updated daily. When connected to the app, data can be synchronized and the device will recalculate new data for the day.
- Enter the heart rate measurement interface, click to start the test after entering the page, and the bottom test light will light up to begin measurement. It takes about 60 seconds, and when it's done, there will be a vibration reminder. If it says 'Not wearing the watch,' you need to wear the watch again.
- Enter the blood pressure measurement interface, and the bottom test light will light up. It takes 30 to 60 seconds, and there will be a vibration reminder when the measurement is completed.
- Enter the blood oxygen measurement interface, and the bottom test light will light up. It takes 30 to 60 seconds, and there will be a vibration reminder when the measurement is completed.
- The watch can sync notifications from common social apps. Note: You can enable/disable sync notifications in the app.

Features

- When the watch is connected to the app, the weather interface will display real-time weather and temperature, as well as weather conditions for the week.
- Options for sports mode: walking, running, hiking, cycling, basketball, soccer, badminton etc., click the icon to start the exercise interface. APP can push sports.
- After the watch is connected to the app, you can control the phone's music player.
- System presets common timer intervals. Click to quickly time. Click the custom button to set the time.
- After the smartwatch is connected to the app, you can set single mode alarms or recurring alarms.
- Click 'Start' once to start the timer, click 'Pause' once to pause the timer, and 'Reset' to reset the timer to zero.
- When the device is connected to the app, click 'Find Phone,' and the phone will ring to indicate a successful search. If the watch is not connected to the app, it will prompt that the phone is not connected.
- You can enable 'Reminders to Move' in the app to remind you to take breaks every hour.

Common Issues

1. The watch cannot be turned on. Please press and hold the power button for more than 3 seconds or the battery may be low and needs charging.
2. Wireless is not connected or cannot connect.
 - 1) Try restarting the watch and reconnecting.
 - 2) Try connecting again after restarting your phone's Wireless.
 - 3) Do not connect your phone to other Wireless devices at the same time.
 - 4) When Wireless is disconnected, functions such as calls, message notifications, and health data syncing will not work.
3. Manual heart rate/blood oxygen/blood pressure measurements are inaccurate.
 - 1) During general measurements, the sensor on the watch may not be in correct contact with the body.
 - 2) Pay attention to ensuring the sensor is in full contact with the wrist during measurement.
 4. Sleep data is not very accurate.
 - 1) Sleep monitoring simulates the user's self-recognition of falling asleep and waking up times; it requires correct device wearing.
 - 2) If you wear it too late or fall asleep too quickly, it may be inaccurate.
 - 3) Sleep monitoring defaults to nighttime monitoring from 9:30 PM to the next morning at 12:00AM.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Waterproof

Waterproof: IPX8(1ATM)

Notes

particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- -Reorient or relocate the receiving antenna.
- -Increase the separation between the equipment and receiver.
- -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- -Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
