5. Type C data only

Getting Started

Step 1.

Move up the notebook screen with maximum angle 145° from the keyboard base.

Step 2.

Connect the power (the battery already installed inside the notebook). Please charge the battery before switching the device on for the first time of use.

Step 3.

Press the power button .

Step 4.

Configure the Windows 11 by following the instruction on the notebook screen.

Step 5.

Activate windows OS, Open **Control Panel**, select **System and Security** and then select **System Windows Activation** **Activate window**.

Power Off Notebook

To switch off your notebook, please do one of the following:

1. Press and hold the power button for a while.
2. Click on start menu
3. click on power
4. then select shut down

Specifications

Model Name: Zedon X-Pro
System Type: x64-Based PC

Processor	Processor	Intel i5 lake core i5-1235G4
GPU	Model	Intel integrated graphics
Display	LCD Display	1920*1080
	Type	IPS
IO ports	USB	USB3.0*3
	Type C	Sub-only*1
Memory Card Slot	Memory Card Slot	Support SD/MC/MSXC
	Video Output	HDMI 1.1 Type A
Audio Inputs and Outputs	2x Microphone	2x stereo Speakers 8W/1W
	DC Port	2 3.5mm power connector
Headphone Port	3.5mm standard	headphone jack
	Integrated Devices	Camera
Battery Pack	Bluetooth	4.2
	Type	Li-Ion 11.61Wh
AC Power Adapter	Capacity	4000mAh
	Max Voltage	11.1V
Input	100-240 VAC	35-60 Hz
	Output Voltage	19.0 V, 3.16A

Specifications

To check your notebook specification, please do one of the following:

1. Open **Control Panel**, select **System and Security** and then select **System**.

2. Type **System information** in the search bar below.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Specific Absorption Rate (SAR) information:

This device meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. FCC RF Exposure Information and Statement the SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: This device has also been tested against this SAR limit.

This device was tested for typical body-worn operations with the back of the This device kept 0mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain an 0mm separation distance between the user's body and the back of This device. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
