Appraisal Result	Pass		
确认结果	合格		

目录/Catalogue

序号 No.	项目 Item	页码 Page No.
1	射频性能测试报告 Radio frequency performance test report	3
2	图纸或实物图片 Drawings or pictures of objects	5
3	尺寸测量报告 Dimensional survey report	5

1. Antenna picture

The report mainly provides the test status of the electrical properties parameters of Q368 walkie talkie. The Q368 walkie talkie antenna is a 462-467MHz Band. The antenna Picture and assembly are shown below. Antenna picture & assembly picture

2. Antenna Test Equipment Introduction

Test of antenna input characteristics using Agilent E5071C and Agilent 5062A vector

network analyzer; The radiation pattern of the antenna are tested using the Satimo starlab

3D near field Anechoic Chamber, and the instrument is used to agilent8960 E5515 and

Agilent E4438C. The test coordinates of the darkroom are as follows

图 4 3D 微波暗室测试坐标系 (back view)

3. Electrical Specification

3-2 Passive S11 parameter

Measuring Method is a 50 Ω coaxial cable is connected to the antenna. Then this cable is connected to a network analyzer to measure the S11 parameter, Keeping this fixture away from metal at least 20cm.

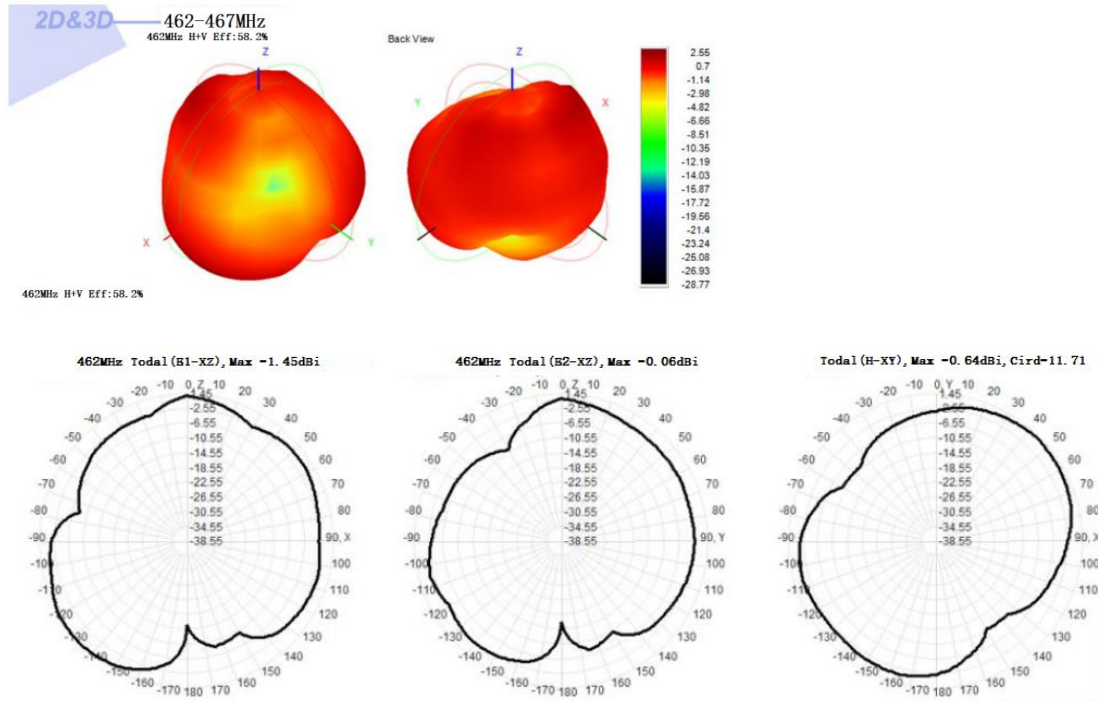

VSWR
