1x Hex Key

Quick Start Guide

If you are a Windows user, please find the appropriate keycaps in the box, then follow the instructions below to find and replace the following keycaps.
Mac / Windows

1 Switch To The Right System

Please make sure the system toggle on
the top left corner has been switched
to the same system as your computer's
operating system.

Mac ● Win

\+

\+

2 Connect 2.4GHz Receiver

Connect the 2.4GHz receiver to
the device USB port.

Switch toggle to 2.4GHz mode

2.4G / Cable / BT

2.4G = 2.4GHz

Type-C
Cable

2.4GHz
Receiver

Extension Adapter
For Receiver

Note: For the best wireless experience, we recommend using the
extension adapter for receiver and putting the 2.4GHz receiver
somewhere on your desk close to your keyboard for a low rate
of latency and fewer signal interferences.

**3** Connect Bluetooth

Switch toggle to Bluetooth

2.4G / Cable / BT

Press fn + 1 (for 4 seconds) and pair with
device named Keychron V6 Max.

fn + 1

4 Connect Cable

+ +

Switch toggle to Cable

2.4G / Cable / BT
5 The VIA Key Remapping Software

Please visit usevia.app to use the online
VIA software to remap the keys.
If the VIA cannot recognize your keyboard,
please reach our support to get the instruction.

V/A

Your keyboard's best friend

*The online VIA software can only run on the latest version of Chrome, Edge, and Opera browsers yet.
*VIA only works when the keyboard is connected by wire to the computer.

6 The Layers

There are four layers of key settings on the
keyboard. The layer 0 and layer 1 are for the
Mac system. The layer 2 and layer 3 are for
the Windows system.

If your system toggle is switched
to Mac, then the layer 0 will be
activated.

If your system toggle is switched to Windows, then
the layer 2 will be activated. Remember that if you
are using it in Windows mode, please make changes
to the layer 2 instead of the top layer (the layer 0).
This is a common mistake people are making.
