

### Instruction:

- ①.Slide backwards the top cover to find out the USB receiver and battery slot
- ②.USB Receiver,when opening the top cover,be careful not drop the USB receiver as it could shake everywhere inside the mouse
- ③.Battery Slot,Powered by 2\*AAA battery (not included)
- ④.On/Off Switch,small design in order to move fluently on surface

### How to use:

- 1.Take out the USB receiver,plug the USB into computer;
- 2.Prepare 2\*AAA battery when you first use it(not included);
- 3.The mouse and receiver will connect automatically in a few seconds.
- 4.If not connect,please take actions below:Turn off the mouse switch, pull down the receiver from computer,plug the receiver and turn on the mouse switch again,get the mouse close distance with the receiver,press the 3 buttons(left button,right button,scroll wheel) together at same time for about 3-5 seconds.

### Notes:

1. Cute design with LED light,as the light is formed only because of light transmission,so the light is not strong,this could also save battery power.
2. It will be better if plug the USB receiver and turn on the Mouse switch at same time.If it can not go to pairing mode,please turn off the Switch,pull down the USB,then try again.

## **FCC Warning**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

### **NOTE 1:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

### **NOTE 2:**

Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
