To cause continued complaints, any changes or modifications not expressly approved by the party responsible for the equipment (for example, unauthorized interface cables or connecting computer or peripheral devices) may void the user's authority to operate this equipment.

complaints could void the user's authority to operate this equipment. (For example, unauthorized interface cables or connecting computer or peripheral devices). This equipment complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including

interference that may cause undesired operation.

FCC statement:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC

rules. These limits are designed to provide reasonable protection against harmful interference in a residential

environment.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the

instructions, may cause harmful interference to radio communications. However, there is no guarantee that

interference will not occur in a particular installation. If this

equipment does cause harmful interference to radio or

television reception, which can be determined by turning the

equipment off and on, the user is encouraged to try to correct

the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into a outlet on a circuit different

from that to which the receiver is connected.

-Connect the equipment into a outlet on a circuit different from

that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for

help. To cause continued complaints, any changes or

modifications not expressly approved by the party responsible for

the equipment (for example, unauthorized interface cables or

connecting computer or peripheral devices). This equipment

complies with Part 15 of the FCC rules. Operation is subject to the

following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including

interference that may cause undesired operation.

RF warning statement:

The device has been evaluated to meet general RF exposure

requirement.

The device can be used in portable exposure condition without

restriction.
