# wireless power bank user manual

parameter

Model No: M-001 Capacity: 5000mAh

Type-C Input: DC5V/3A 9V/2.22A 12V/1.67A Type-C Output: DC5V/3A 9V/2,22A 12V/1,67A Wireless Charger Output: 15W(MAX)

# Precautions for use

- 1. Please fully re-charge the power bank when first use
- 2. When use the power bank, it will become little hot because of its magnetic fast charging.
- 3. Soaking in seawater or water is strictlyprohibited. When not in use, keep it in a cool and dry environment.
- 4. Use and detention near heat and high temperature sources such as fires and heaters are prohibited.
- 5. Please use a regular charger when charging.
- 6. It is strictly forbidden to use the power supply with the  $\,$ positive and negative electrodes turned upside down.
- 7. It is prohibited to throw this product into a fire or heater
- 8. It is prohibited to transport or store this product with metal such as hairpins and necklaces.
- 9. Knocking, throwing, trampling and falling are prohibited. Failure to do so can cause overheating, ignition, dysfunction, and shortened lifespan.
- 10. Dismantling and piercing are prohibited.
- 11. It is prohibited to use or leave it in high temperature (in hot sunlight or in a hot car). Failure to do so can cause overheating, ignition. dysfunction, and shortened lifespan.
- 12. Use in places with strong static electricity or magnetic fields is prohibited. Otherwise, the safety protection device will be vulnerable to damage.

### **FCC Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.

## FCC Radiation Exposure Statement

This device complies with FCC radiation exposure limits set forth for an uncontrolled environment and it also complies with Part 15 of the FCC RF Rules. This equipment must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provide with antenna installation instructions and consider removing the no-collocation statement. 

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
