

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a white test chamber with a blue and silver electronic device on top. A thick orange cable runs from the device to a small electronic unit on the floor. To the right is a wooden workbench with a smartphone and other small items on it. The background shows a wall with electrical outlets and a yellow and black striped safety pole.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test chamber. The walls are covered with white, cross-shaped electromagnetic interference (EMI) absorbers. In the center, a black metal frame holds a white test table. A small electronic device is placed on the table. The floor is marked with yellow and blue caution tape.

Radiation Emission Test Setup (30MHz to1GHz)	A photograph of a radiation emission test setup for the 30MHz to 1GHz frequency range. The setup is located inside an anechoic chamber with walls covered in white cross-shaped absorbers. A white, rectangular test fixture is positioned on a black table in the center of the chamber. The floor is marked with yellow and blue caution tape. A metal ladder is visible on the right side of the chamber.
Radiation Emission Test Setup (1GHz to18GHz)	A photograph of a radiation emission test setup for the 1GHz to 18GHz frequency range. The setup is located inside an anechoic chamber with walls covered in white cross-shaped absorbers. A white, rectangular test fixture is positioned on a black table in the center of the chamber. The floor is marked with yellow and blue caution tape. A metal ladder is visible on the right side of the chamber. A large, white, rectangular object is visible in the foreground on the right side of the chamber.
